LIVING ON THE EDGE

Living on the Edge is our motto that expresses our mission to provide extreme products for those who demand the most from themselves and their equipment.

For more than 25 years, SOG has supplied militaries, law enforcement personnel, outdoorsmen and the general public the finest values in innovative knives and multi-tools. Tested by time, adversity and the unexpected, SOG products are appreciated by those 'in the know' for leadership in performance and reliability. We continue to combine artistry, science and innovation to create products of the highest caliber that are used throughout the world.

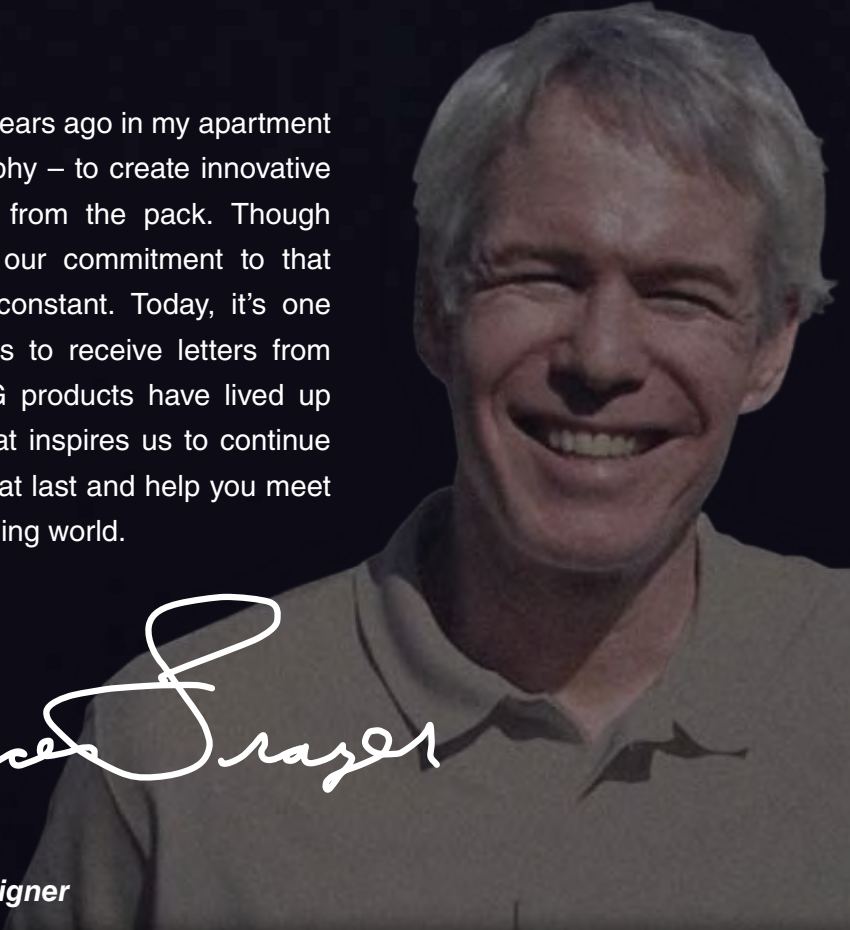

We don't settle for the ordinary. We never did... we never will.

Check out our full array of distinctive gear that includes professional grade multi-tools, technical assisted folders, proven fixed blades, the fastest automatic knives, as well as essential outdoor gear.

SOG started some 25 years ago in my apartment with a simple philosophy – to create innovative products that stood apart from the pack. Though the company has grown, our commitment to that philosophy has remained constant. Today, it's one of my greatest satisfactions to receive letters from users describing how SOG products have lived up to their reputation. It is what inspires us to continue designing great products that last and help you meet the challenges of a demanding world.

A WORD FROM
THE GUNNY

I have been involved with knives and tools since my grandfather gave me my first pocketknife. It meant more to me than just a knife. It represented a trust and a rite of passage. That's something that most of you can relate to and an experience we need to keep alive for our young people today.

Since that time, I have used knives and tools continually throughout my career, on the ranch, in the military, and all over the world on set. I had carried a SOG multi-tool for years before we decided to work together and those who know me, know that I will only be associated with the very best.

Take a look at our 2012 product lineup. You will see a great selection of products that are not just about what you can do with them, but what they mean to you.

R. Lee Ermey "The Gunny" USMC Veteran, TV Show Host, Actor

PowerLock (Page 9)

MULTI-TOOLS

As one of the original multi-tool manufacturers, we have learned quite a bit over the years, such as how to make the toughest tools with patented gear driven Compound Leverage mechanisms. You have let us know that quick access is a must. Just flip our tools out with one hand and see for yourself how well we listened. There is also a myriad of features that you might not readily see, like our saws cut faster and our files shave better. Does all this make sense? You bet, which is why leading military forces choose SOG!

Feature Key

Denotes a new product for 2012.

Includes Compound Leverage. For more info, see page 7.

Includes Safety locking mechanism.

This number corresponds to a number on the sizing chart at the bottom of the page.

PowerDuo

Creating versatile, innovative, and dependable products is what SOG has become known for. The new PowerDuo is a hybrid between our knife mentality and tool sensibility. It has a split personality. It is neither knife nor tool, but an equal combination of both nested in a compact form. Take away the pliers and you have a multi-blade pocketknife with a full size locking blade, screwdrivers, can/bottle openers, tweezers, etc. Take the knife side away and you have SOG's renowned Compound Leverage pliers with one-handed flip opening capability. Put the two together and the PowerDuo gives you options in an ever-changing volatile world.

Open:	6.2"	Weight:	6.3 oz.
Blade:	2.9" x 0.1"	Steel:	9Cr18MoV Stainless Steel Rc. 58-60
Handle:	Polycarbonate / Stainless Steel	Sheath:	Nylon
Components:	Blade, Phillips Screwdriver, Bottle Opener/Flat Screwdriver, Can Opener/Small Flat Screwdriver, Toothpick, Tweezer

Compound Leverage
Gears in the handle allow for both quick, one-handed opening, as well as 2 times the gripping strength of comparable multi-tools.

PowerAssist

The PowerAssist is one of the worlds most advanced multi-tools. Not only does it use our patented one-hand flip opening and gear driven Compound Leverage, but it also has what no other does...assisted blade technology! Not just one but two blades employ SOG SAT technology that takes over to complete the opening once the blade is manually started. When not in use the blades lock closed using our side release mechanism. Its never been easier to deploy the knives. Flip open the tool and experience the precision of the heavy duty plier capability and large wire cutters. Smooth handle surfaces promote comfort on even the toughest jobs. Also includes gear covers, proprietary V-Cutter and built in crimpers. Get ahead of the game with the PowerAssist!

- Open: 7" Weight: 9.6 oz.
- Blade: 2.75" x 0.095" Steel: 420 Stainless - Rc. 51-53
- Handle: 420 Stainless Steel Sheath: Nylon
- Components: Pliers/gripper, hard wire cutter, crimper, straight edge blade, fully serrated blade, 3-sided file, large screwdriver, Phillips screwdriver, can opener/small screwdriver, bottle opener/medium screwdriver, scissors, rulers, and lanyard ring.

EOD version available with fuse well spike in place of Phillips screwdriver, file and bottle opener/medium screwdriver.

PowerLock

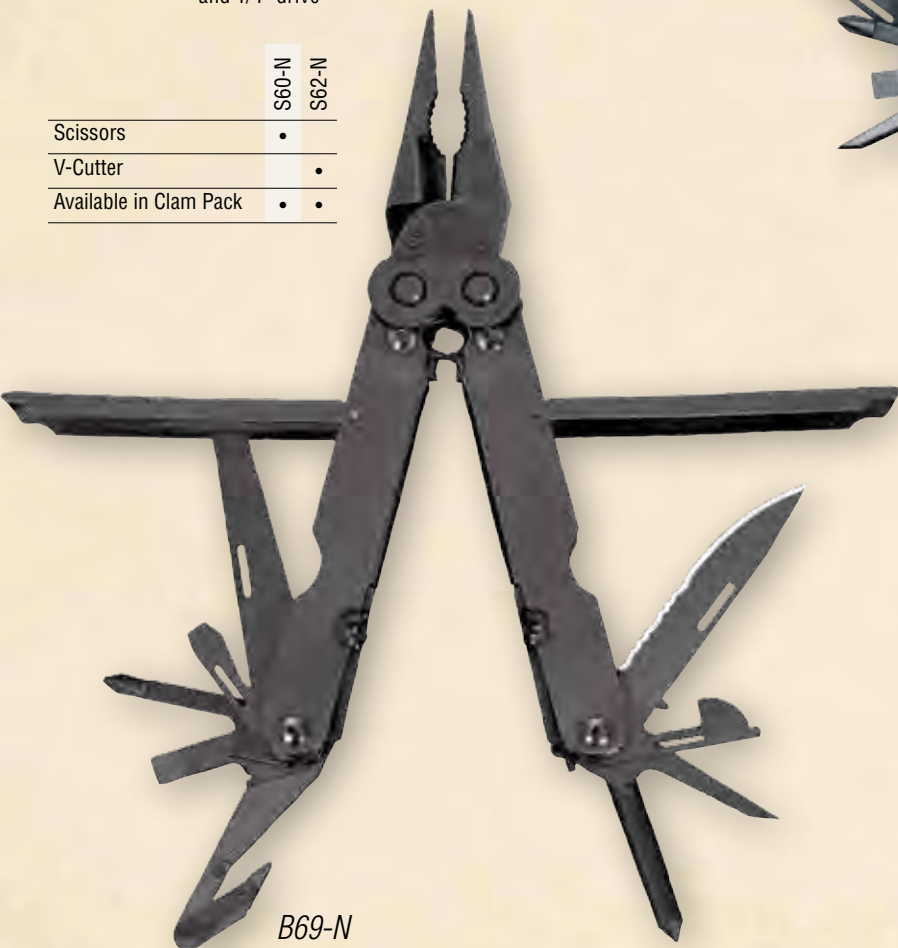

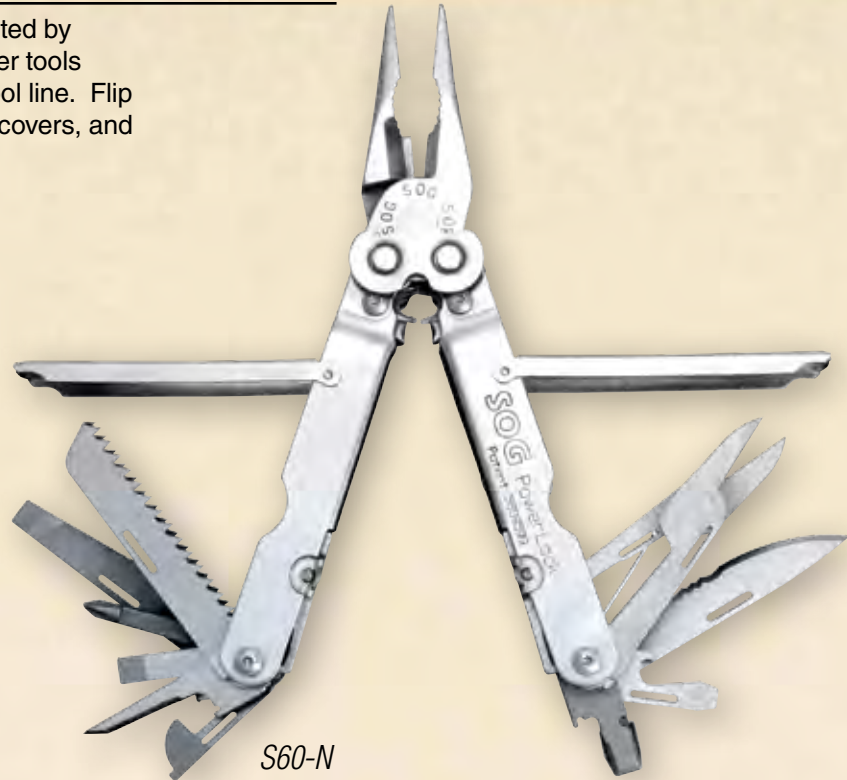

The PowerLock's success over the years has been documented by countless testimonials where the PowerLock starts when other tools stop. It is our workhorse and the center for our entire Multi-tool line. Flip opening, locking components, gear covers, auxiliary handle covers, and hex construction are all standard.

Open: 7" Weight: 9.6 oz.
 Blade: 2.75" x 0.08" Steel: 420 Stainless - Rc. 51-53
 Handle: 420 Stainless Steel Sheath: Nylon
 Components: Pliers/gripper, hard wire cutter, crimper, double toothed wood saw, 1/2 serrated blade, 3-sided file, large screwdriver, Phillips screwdriver, 1/4" drive, awl, can opener/small screwdriver, bottle opener/medium screwdriver, scissors, rulers, and lanyard ring.

EOD version available with fuse well spike that replaces the saw and 1/4" drive

PowerLock EOD 2.0

Using the proven PowerLock chassis, SOG is the only company to apply Compound Leverage technology to EOD (Explosive Ordnance Disposal), this makes it a breeze to crimp blasting caps. Another unique SOG feature is the positioning of the crimper device within the confines of the handle, not in the plier jaw, like all other designs. This serves to minimize collateral damage to the crimper and allows the operator to have full use of the uninterrupted plier surface. Additionally there is no weakening of the pliers that often causes breakage of the plier tips.

See PowerLock for complete specifications

Paratool

The Paratool is the only multi-tool with multiple-angled plier head capability. The unique, patented way the Paratool opens allows for the ability to operate at a variety of angles (140°-180°), indispensable in tight spots. The comfort grip handles are smooth on the outside and feature SOG's classic ventilation holes for maximum gripping. Be prepared with the Paratool.

Open:	6.4"	Weight:	6.2 oz.
Blade:	2.75" × 0.08"	Steel:	420 Stainless - Rc. 51-53
Handle:	420 Stainless Steel	Sheath:	Nylon
Components:	Pliers/gripper, wire cutter, serrated blade, straight blade, 3-sided file, large screwdriver, Phillips screwdriver, awl, can opener/sm. screwdriver, bottle opener / med. screwdriver, rulers, and lanyard ring.

CrossCut

The CrossCut is precision instrument for cutting, personal care and the unexpected. SOG's gear-driven Compound Leverage allows for big-sized cutting power to be truly miniaturized with the spring-loaded scissors. Open the handles and this micro machine is ready to work for you. Wait until you feel the action!

Open:	4"	Weight:	1.7 oz.
Blade:	2" × "	Steel:	420 Stainless - Rc. 51-53
Handle:	420 Stainless Steel	Clam Pack Only	
Components:	1.3" scissors, straight blade, nail file, medium screwdriver, small screwdriver, bottle opener, tweezers, toothpick and ruler		

CC51-CP

Pocket PowerPlier

Our quick deployment P3 is lighter, sleeker, and just as durable as our larger tools. Who says that great things don't come in smaller packages? We managed to downsize the same power and durability while maintaining the key features of Compound Leverage and one-hand flip opening. SOG's Pocket PowerPlier is packed with essential tools that include pliers/grippers, wire cutters, partially serrated blade, small/large screwdrivers, Phillips screwdriver, three-sided file, can opener, bottle opener, awl, rulers, lanyard and heavy duty Nylon pouch. It's a smart choice for those on the go.

DarkEnergy (Page 13)

ILLUMINATION

CUTTING THROUGH THE DARKNESS

This ushers in a new chapter for SOG and for illumination. For more than 25 years professionals have depended on SOG. Just like our knives and tools, these new lines of torches are of the highest quality, engineered for optimum reliability, and are ergonomically superior. They are not just new, they are exceptionally different. Engineered from the ground up, with no pre conceived ideas of what lights should be, we have optimized illumination for the future.

Feature Key

Denotes a new product for 2012.

Includes an LED Flashlight. See product for details.

This number corresponds to a number on the sizing chart at the bottom of the page.

BladeLight

Not often are we able to bring you what we feel is so new, so functional, and so outside the box that it is a game changer! Enter: BladeLight. It's patent pending technology employs 6 LEDs molded into the GRN handle on either side of the knife blade, providing shadowless light when cutting or flashlight capability (while sheathed or closed). Of course the knives can still be used without turning on the LEDs. Powered by standard alkaline batteries, state of the art push button switches/circuitry and an IPX-7 rating for water resistance to full immersion it's easy to see the BladeLight is no amateur. When night is upon you, no longer will you be juggling a light in one hand and knife in the other.

See DarkEnergy section for more information on ratings and specifications.

The 6 LED lights in the handle of the fixed blade Blade Light can even be seen when the knife is safely stowed in the included hard molded nylon sheath!

BladeLight Fixed

The clip point fixed blade is matched to a streamlined handle for excellent balance and intuitive control. A single AA battery provides 25 Lumens of bright white light. The molded hard sheath is easily removed from ones belt allows the flashlight to be used while the knife is in the sheath. Also, while mounted on ones hip, the light can illuminate your way. The sheath features a patent pending button retention system and quiet carry tensioner. Included with the knife and sheath are two spare batteries and a removable nylon pouch that can be mounted on the front or back of the sheath.

- Open: 11.3"
- Blade: 5.7" x 0.180"
- Handle: Glass-Reinforced Nylon
- Weight: 7.1 oz.
- Steel: 9Cr18MoV Stainless Steel - Rc. 58-60
- Battery: 1 - AA (included)
- Lumens: 25
- Burn time: 175 minutes

BLT-10

BladeLight Folder

The clip point blade folds into a sleek molded GRN handle with liner lock. Twin AAA batteries provide 34-37 Lumens of bright white light.

- Open: 9"
- Blade: 3.9" x 0.11"
- Handle: Glass-Reinforced Nylon
- Weight: 4.3 oz.
- Steel: 9Cr18MoV Stainless Steel - Rc. 58-60
- Battery: 2 - AAA (included)
- Lumens: 34-37
- Burn time: 260 minutes

BLT-50

DarkEnergy

DarkEnergy, the SOG line of flashlights, pierces the night. They look different and they behave differently. Our goal was simple. We wanted you to have the brightest flashlights of their size. You will be surprised at the power when you switch on the DarkEnergy lights, with 247 lumens in the palm of your hand! Light up the tree tops to appreciate the penetration and range. We also wanted you to have the best switch in the business, so we developed a full on full off switch (each and every time) that also half-taps to 40% output and then tactical strobe (see next page). The 6061 T6 aluminum housings are aggressively checkedered.....more than any other, and are coated in a Class III anodizing for maximum durability. Count on us when light is not enough... but when blindingly bright is.

DarkEnergy... Piercing the night

DE-01

DarkEnergy 214A

Open:	3.8"	Weight:	3 oz.
Battery:	1 CR-123A (Included)	Lumens:	214 @ 100%
Burn Time:	80 min @ 100%, 180 min @ 40%		
Handle:	Black Hard Anodized Class II, Type III, 6061-T6 Aluminum		

DE-02

DarkEnergy 247A

Open:	5.1"	Weight:	4.1 oz.
Battery:	2 CR-123A (Included)	Lumens:	247 @ 100%
Burn Time:	145 min @ 100%, 485 min @ 40%		
Handle:	Black Hard Anodized Class II, Type III, 6061-T6 Aluminum		

The DarkEnergy Difference:

Brightness - Many companies boast of a certain lumen output (from the LED/bulb manufacturers) but have they ever tested it? We have. Our testing equipment is state of the art. When we give you a spec, it has a realistic range or tolerance because all LEDs vary in output, i.e. 225-238 lumens. We are using the CREE XPG R5, which puts out a whiter light more usable to the human eye. This makes our torch the very brightest for its size.

Battery Life – When we give you a specification for time until the remaining battery life is at 10%, not 0% like other companies. For example our DarkEnergy 247A light has a burn time of 145 minutes at 100% power.

Anodizing - We are using a Mil-Spec Type III hard anodizing process that is tougher and harder than almost all other flashlights. We also use a proprietary process to make the anodizing more non-slip and anti-reflective.

Material - Our lights are manufactured from aerospace-grade 6061-T6 aluminum. Our clips are made from heat treated stainless steel.

Design - SOG style is hard to duplicate. Our knurling is deeper and our general configuration requires much more machining than standard flashlights. Resulting in a unique style that is distinctively SOG. Notice how SOG is actually machined into the handle rather than stamped or engraved. It is these details that make the difference between the ordinary and extraordinary.

Circuits - The circuits that we use make the LED more efficient (brighter) and allow the battery to run longer. Ours has three settings, 100%, 40% (lengthens burn time), and strobe. This is a proprietary SOG innovation developed in conjunction with law enforcement.

Switches - We use the very best. There is a huge difference in the quality of switches. Full power can be accessed on and off with a light touch as well as fully switched on each time.

Reflectors /lenses - We use formed aluminum rather than coated plastic for the reflector, which produces better light transmittance and pattern. The reflector uses a special surface configuration to control the focus. The shatter resistant optical-grade polycarbonate lens is clearer than those of competitors.

Batteries – Our lights use the best power sources available, the CR-123A Lithium battery. This represents the very best in battery technology and is readily available across the globe.

Quality control and ratings - Our lights meet or exceed ANSI FL1-2009 requirements according to the industry testing standards published by the US National Electrical Manufacture Association. Our lights are assembled in a dust-free laboratory environment to insure reliability and performance. Our state-of-the-art lab tests light output, water/weather resistance, peak beam intensity, impact resistance, thermal shock, cycling etc.

Twitch XL (Page 23)

ASSISTED KNIVES

SOG Assisted Technology works through the balance of opposing high-tension coil springs. As one opens the blade the force to propel the knife open becomes greater than the closing force and the blade will open on its own. The end result propels the blade out once the operator has initiated the one-handed opening action. SAT works so well that right-handers can use their left hand equally well to open a folding knife (of course this works oppositely for lefties).

Assisted Technology also comes in a multi-tool! See the PowerAssist on page 8 for more info.

Feature Key

Denotes a new product for 2012.

This product has been cryogenically heat treated. See page 48 for more info.

This knife features a blade kick. See page 29 for more info.

Includes Safety locking mechanism.

This number corresponds to a number on the sizing chart at the bottom of the page.

SlimJim

Our new technical assisted folding knife line, stands out by virtue of simplicity and minimalism. It doesn't try to be the biggest or the loudest in the crowd. It is unobtrusive but always there when you need it. Constructed from a single piece of steel, SlimJim is just that, the slimmest assisted knife in the world. Start to open the blade, and let SOG Assisted Technology (S.A.T.) finish the action with a bang, using one of the surest assisted technologies out there. Tactile bumps and cutouts aid in control while all features are purposeful and functional. The patent-pending safety is used to insure the retention of the blade in the handle as well as acts as a double lock in the open position. The stealth carry clip is reversible. Available in two sizes and with fully blacked out version.

SlimJim XL

Aegis

Aegis (ee-jis), which in Greek means shield or protection, is also the code name for the world's premier integrated air defense system. No wonder we borrowed the name to represent this state of the art line that is filled with technology and features. Start to open the knife, and let Aegis finish the action with a bang, using one of the surest assisted technologies (SAT) out there! Our trademark bayonet reversible clip, built in safety with red/ready to go, checkered DigiGrip handles, and tacky rubber inserts all contribute to make Aegis a platform for today's changing world. Cover your back with Aegis outdoor or tactical blades.

The Aegis offers a discreet clips which sits low in the pocket, thanks to a bayonet style reversible clip design.

Flash

The Flash Series has become one of the most popular in our line. Forget its wicked-quick blade access, that it handles like a race car on rails, or that it locks up like Alcatraz. It just looks and feels extraordinary. The Flash features SOG Assisted Technology (S.A.T.), which employs a powerful piston lock that is easily released with a sliding button. We also had the foresight to incorporate an additional safety lock that gives added security when the blade is closed. Note that when the safety shows red, you are ready to go.

Flash I

The Flash I is the smaller sibling to the Flash II. It has the same features as the full size version including SAT, blade locking safety and reversible pocket, just in a more compact package. Perfect for those times when smaller is better.

Open: 5.75" Weight: 1.3 oz.
 Blade: 2.5" x 0.09" Steel: AUS-8 - Rc. 57-58
 Handle: GRN or Hard-Anodized Aluminum Includes: Reversible Bayonet Pocket Clip

SOG-TAC Automatic (Page 26)

AUTOMATIC KNIVES

“Just good enough” and “to fast” are not words in our vocabulary.

Continuing to produce top line products for professionals is what we are all about. We know you will find that SOG Automatics walk the walk and talk the talk. Hold on for a wild ride!

All automatic knives are intended for LE and MIL customers only

Feature Key

Denotes a new product for 2012.

Includes Safety locking mechanism.

This number corresponds to a number on the sizing chart at the bottom of the page.

Spec Elite Automatic

Spec Elite Automatic knives is a tough contender when the sheet hits the fan. With handles manufactured from 6061-T6 hard-anodized aluminum these knives employ our state-of-the-art auto mechanism to ensure they open with conviction. New technology springs insure tens of thousands of reliable openings. Built-in safeties, reversible low carry clips and stout but very thin construction make them ideal for LE and Military.

Clip detail on the SOG-TAC Automatic and SOG-TAC Mini Automatic (Black TiNi models)

Arcitech (Page 35)

ARC-LOCK KNIVES

The patented Arc-Lock just might be the perfect lock. Why? It is totally ambidextrous and has all of the attributes knife designers relentlessly search for, but rarely find. Strength: The Arc-Lock far surpasses conventional lock strength, tested at over 1000 pounds of force measured at the lock in an independent lab test. Speed: The Arc-Lock provides lightning-quick, one-handed opening and closing capability. Safety: Spring-action securely retains the blade closed. When unlocking, the fingers are safely kept clear. Durability: The Arc-Lock is self-adjusting over time and can be easily cleaned for long-term optimal performance.

Feature Key

Denotes a new product for 2012.

This knife features a blade kick. See page 29 for more info.

This number corresponds to a number on the sizing chart at the bottom of the page.

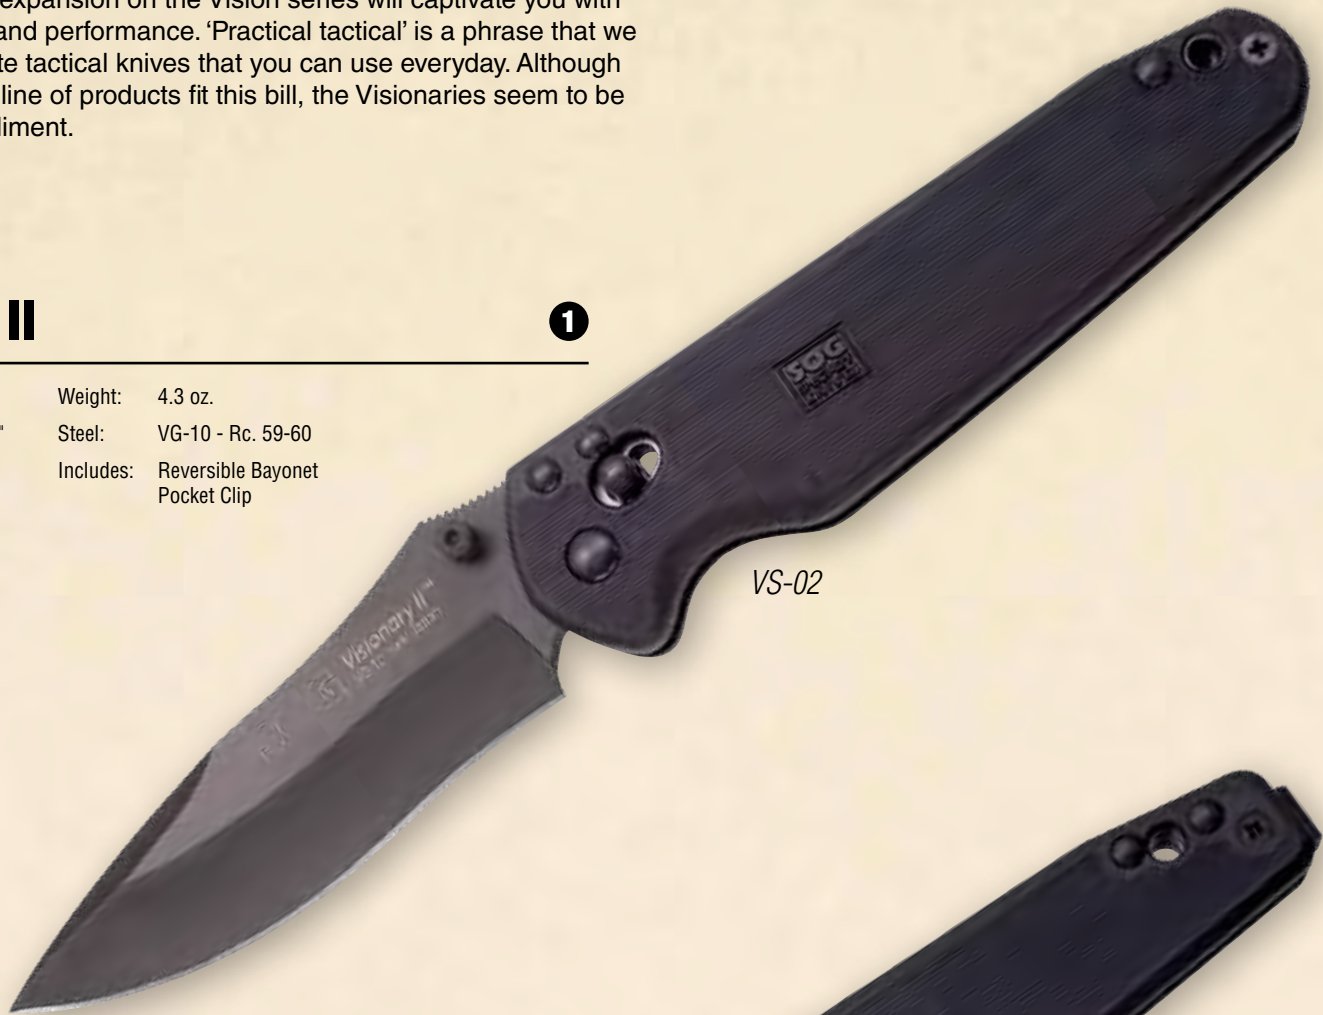

Visionary

Visionaries are leaders because they dare to see beyond the present. We think that this expansion on the Vision series will captivate you with its sense of style and performance. 'Practical tactical' is a phrase that we coined to designate tactical knives that you can use everyday. Although many of the SOG line of products fit this bill, the Visionaries seem to be the perfect embodiment.

Visionary II

1

Open:	8.37"	Weight:	4.3 oz.
Blade:	3.75" x 0.125"	Steel:	VG-10 - Rc. 59-60
Handle:	GRN	Includes:	Reversible Bayonet Pocket Clip

VS-02

Visionary I

2

Open:	7"	Weight:	3 oz.
Blade:	3" x 0.12"	Steel:	VG-10 - Rc. 59-60
Handle:	GRN	Includes:	Reversible Bayonet Pocket Clip

Available in Clam Pack

VS-01

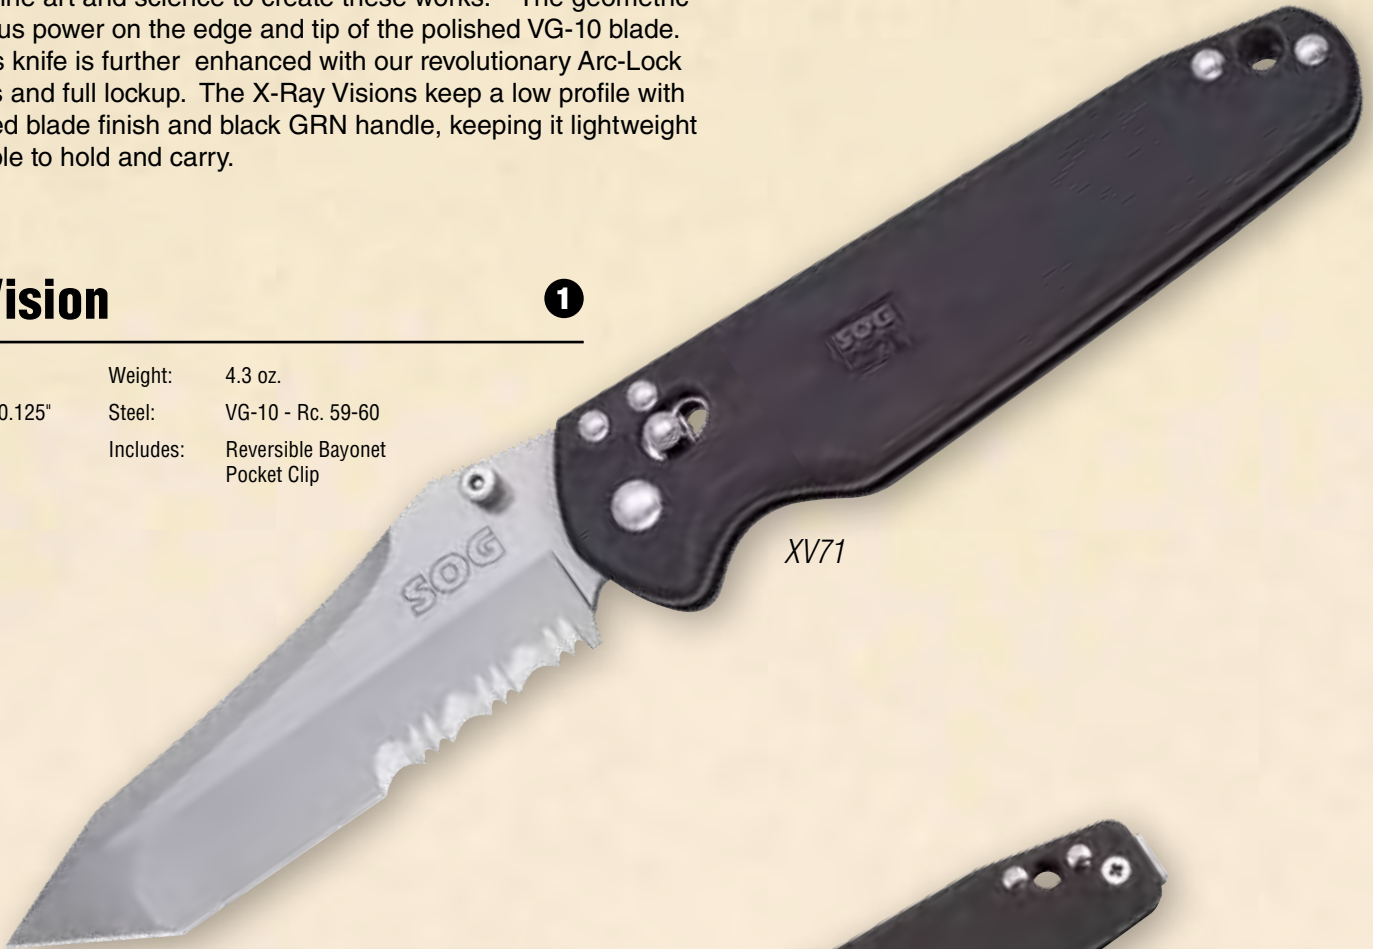

X-Ray Vision

The radical blades of these award-winning knives set them apart from all others. They definitely have the X factor. There is only one place to our knowledge that can grind this complex of a shape... Seki, Japan. Our artisans combine art and science to create these works. The geometric grind lines focus power on the edge and tip of the polished VG-10 blade. Better still, this knife is further enhanced with our revolutionary Arc-Lock for fast access and full lockup. The X-Ray Visions keep a low profile with its bead blasted blade finish and black GRN handle, keeping it lightweight and comfortable to hold and carry.

X-Ray Vision

1

Open:	8.37"	Weight:	4.3 oz.
Blade:	3.75" x 0.125"	Steel:	VG-10 - Rc. 59-60

Open:	7"	Weight:	3 oz.
Blade:	3" x 0.12"	Steel:	VG-10 - Rc. 59-60
Handle:	GRN	Includes:	Reversible Bayonet Pocket Clip

Available in Clam Pack

MXV72

The X-Ray Vision and Visionary offer discreet clips which sit low in the pocket, thanks to a bayonet style reversible clip design.

Pentagon Elite

Since its debut, the Pentagon Elite series has achieved great popularity among the military and law enforcement community, as well as the general marketplace. The Pentagon Elite knives are impeccably balanced and feature ergonomic Glass-reinforced Nylon handles, ambidextrous slotted thumbstuds, machine screw construction, a low-reflective bead-blasted blade and clip, SOG's Arc-Lock system and a reversible military-style clip that enhances gripping. Spearheading the Pentagon Elite is a shark tooth tip that increases point strength.

Whether for everyday carry or for more rugged outdoor use, the Pentagon Elite and Spec Elite are up for the task.

Pentagon Elite II

1

Open:	10.75"	Weight:	6.8 oz.
Blade:	5" x 0.160"	Steel:	VG-10 - Rc. 59-60

SE-14

Spec-Elite Mini

NEW 3

We have taken our immensely popular Spec Elite knife and miniaturized it, to make the Spec Elite Mini. It is built around our best locking mechanism the Arc-Lock. The stout racy blade shape is crafted with VG-10 stainless steel and is designed for performance with a reverse curve main edge. The Mini features glass-reinforced handle with stainless steel liners, dual thumbstuds, machine screw construction, a low-reflective bead-blasted blade and our trademark reversible low-carry pocket clip. Pack some punch with the Spec Elite Mini.

Open:	6.5"	Weight:	2.7 oz.
Blade:	2.75" x 0.135"	Steel:	VG-10 - Rc. 59-60
Handle:	GRN	Includes:	Reversible Bayonet Pocket Clip

SE-01

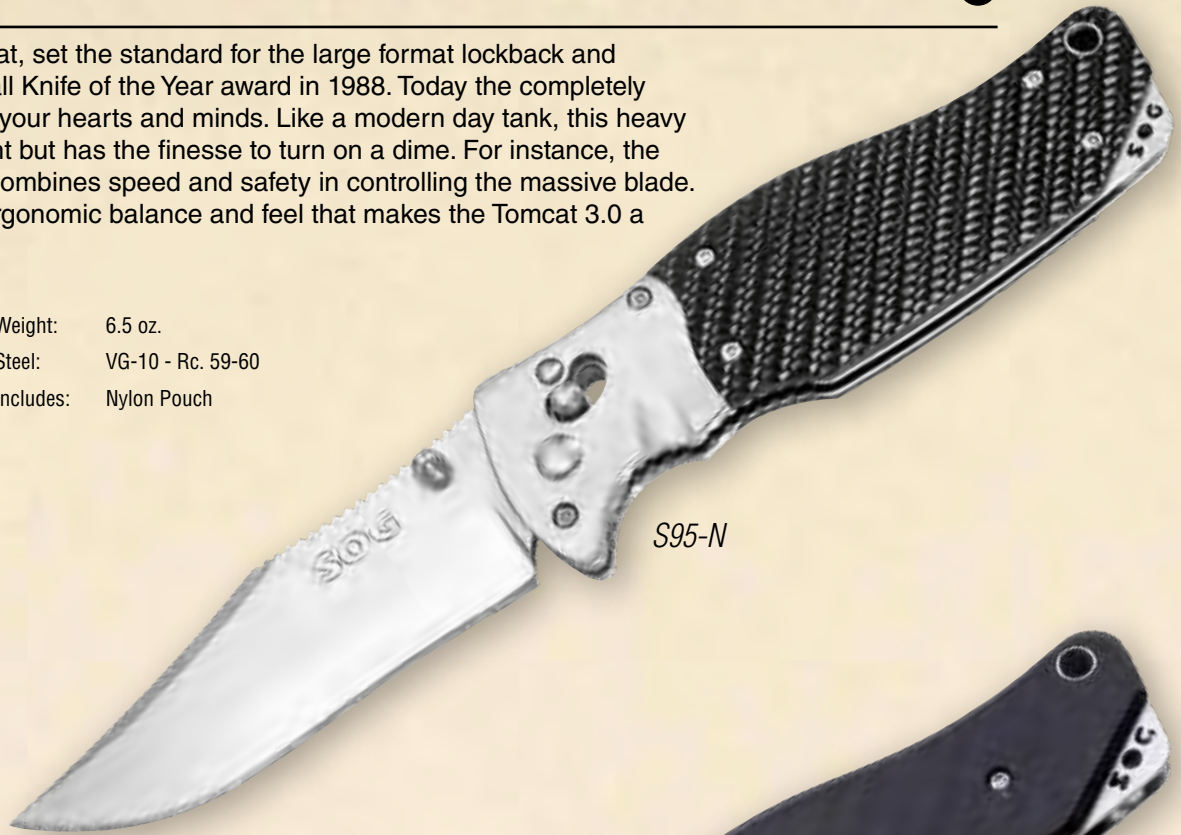

Tomcat 3.0

1

Our first folding knife, the Tomcat, set the standard for the large format lockback and won the Blade Magazine Overall Knife of the Year award in 1988. Today the completely redesigned Tomcat 3.0 will win your hearts and minds. Like a modern day tank, this heavy duty folder is big time armament but has the finesse to turn on a dime. For instance, the 3.0 features our Arc-Lock that combines speed and safety in controlling the massive blade. There is also a new sense of ergonomic balance and feel that makes the Tomcat 3.0 a very soulful package.

Open:	8.65"	Weight:	6.5 oz.
Blade:	3.75" x 0.16"	Steel:	VG-10 - Rc. 59-60
Handle:	Kraton or Carbon Fiber	Includes:	Nylon Pouch

S95-N

S95SL-N

The backside of the Tomcat LTD (S95SL) features a beautiful flat grind with satin finish.

Fatcat

2

The Fatcat is like our Tomcat after exposure to high levels of radiation. Our largest and most massive folder that we have ever produced, the Fatcat is not intended for the main stream. It is designed to be exceptional with never before seen details such as a dual-tone TiNi coated blade. Anyone who picks up this knife is amazed at the lightness and quickness, which is attributed to the solid machined Titanium handle. Once started, the gigantic VG-10 blade effortlessly spins open and locks up with one of the world's greatest locks; the Arc-Lock.

Open:	10.125"	Weight:	8.5 oz.
Blade:	4.5" x 0.16"	Steel:	VG-10 - Rc. 59-60
Handle:	Titanium Bolster and Liners with Kraton	Includes:	Nylon Pouch

FC01-N

Arcitech

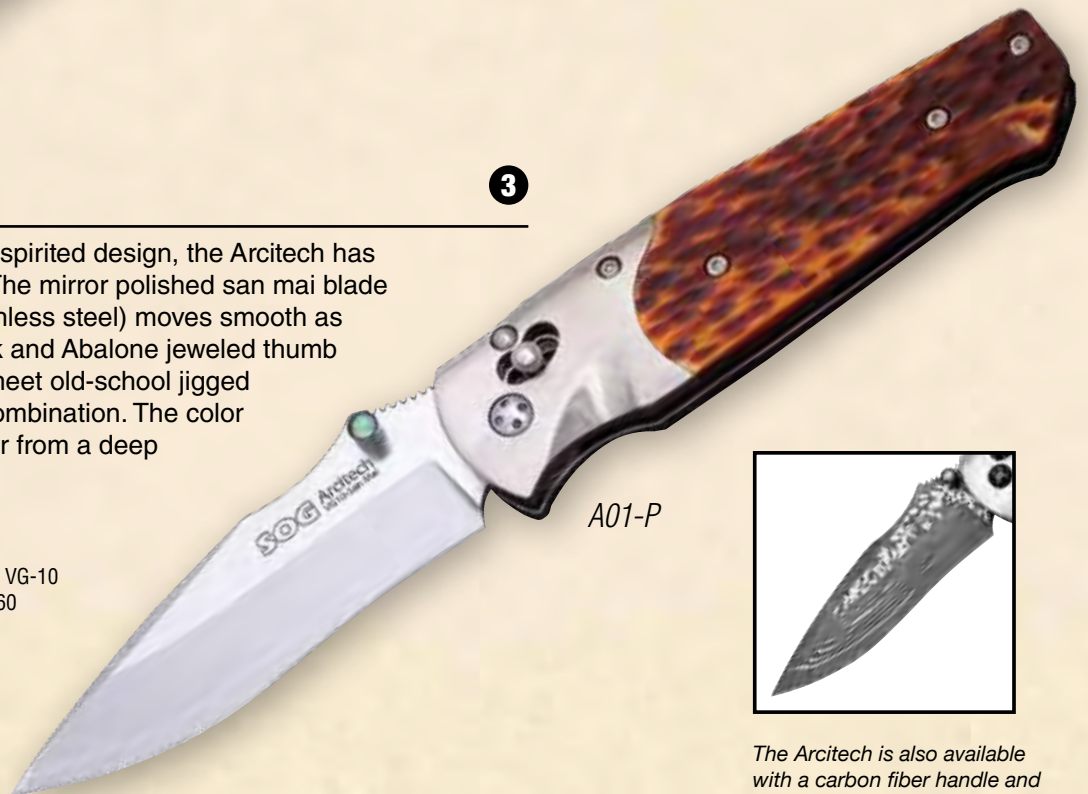

3

Combining technical excellence with a spirited design, the Arcitech has that trait that is so elusive... harmony. The mirror polished san mai blade (VG-10 core laminated with 420J2 stainless steel) moves smooth as silk thanks to our very special Arc-Lock and Abalone jeweled thumb stud. The titanium bolsters and liners meet old-school jiggged bone handles in a rare and beautiful combination. The color of the jiggged bone handles vary in color from a deep maroon to flame yellow and black.

Open:	8"	Weight:	4.5 oz.
Blade:	3.5" x 0.125"	Steel:	san mai VG-10 Rc. 59-60

A01-P

The Arcitech is also available with a carbon fiber handle and a Damascus blade (A03-P).

Access Card 2.0

1

The Access Card 2.0 doesn't grant admission into top-secret facilities, but it does give a sense of security. This minimalistic sliver of a knife (3/16" thick without the clip) won't take up much room in your wallet, pocket, attached to a ballistic vest, or around your neck. The 2.75" formidable VG-10 blade opens and closes with one hand like a magic trick and locks up with our famous Arc-Lock. Although every bit of excess weight has been engineered out of the Access Card, you will be surprised at the power that it conveys.

Open: 6.2" Weight: 1.8 oz.
Blade: 2.75" x 0.08" Steel: VG-10 - Rc. 59-60
Handle: Stainless Steel Includes: Pocket / Money Clip

SOGAC77

Satin Finish	•
Tactical Black Finish	•

Toothlock

2

The Toothlock is a new design expression. It combines a high performance piston lock but with the addition of a kick start device. Pull back the lock and the blade is nudged out of the handle to start its journey. Why the name the Toothlock? Check out the shape of the lock bar with its two-lobe geometry. This new technology merges with an assertive handle pattern that changes direction to match the tactile points on the hand. The blade shape is novel as well with a wavy reverse curve that cuts effortlessly while maintaining a thick reinforced tip for power penetration. The san mai blade is ground to perfection and is reminiscent of ancient samurai designs.

Open: 7.35" Weight: 3.3 oz.
Blade: 3.05" x 0.12" Steel: san mai VG-10 - Rc. 59-60
Handle: GRN Includes: Reversible Bayonet
Pocket Clip

Gunny Folder

These limited edition, heirloom-quality knives are the first co-designed by R. Lee Erme, aka "The Gunny," and SOG Specialty Knives & Tools. Each knife is meticulously crafted using exotic Cocobolo hardwood handles which feature a stingray hide inlay, along with nickel-plated replicas of the commemorative Gunny coin. Paired in true SOG style with a durable VG-10 stainless steel blade, each knife includes a handcrafted leather sheath. Each limited edition Gunny knife is individually presented in its own beautiful walnut box with a full-size commemorative Gunny coin and Certificate of Authenticity signed by both Erme and SOG Founder and Chief Designer, Spencer Frazer.

Open: 9.1"
 Blade: 4" x 0.15"
 Handle: Cocobolo Hardwood, Stingray Skin Inlays, Stainless Guard & Pommel, Nickel Plated Coins
 Weight: 7.4 oz.
 Steel: VG-10 - Rc. 59-60
 Includes: Leather Sheath, Display Box, Certificate of Authenticity, Full Size Gunny Challenge Coin

Limited to 1000 serialized pieces.

The Gunny Folder comes with fine crafted leather pouch for easy carry when you're out on the go.

GFL01-L

R. Lee Erme

Salute (Page 39)

FOLDING KNIVES

SOG folding knives have traversed the globe, been used in almost every thinkable application, and have come through with flying colors. As always at SOG, innovation at a reasonable price is where the magic starts.

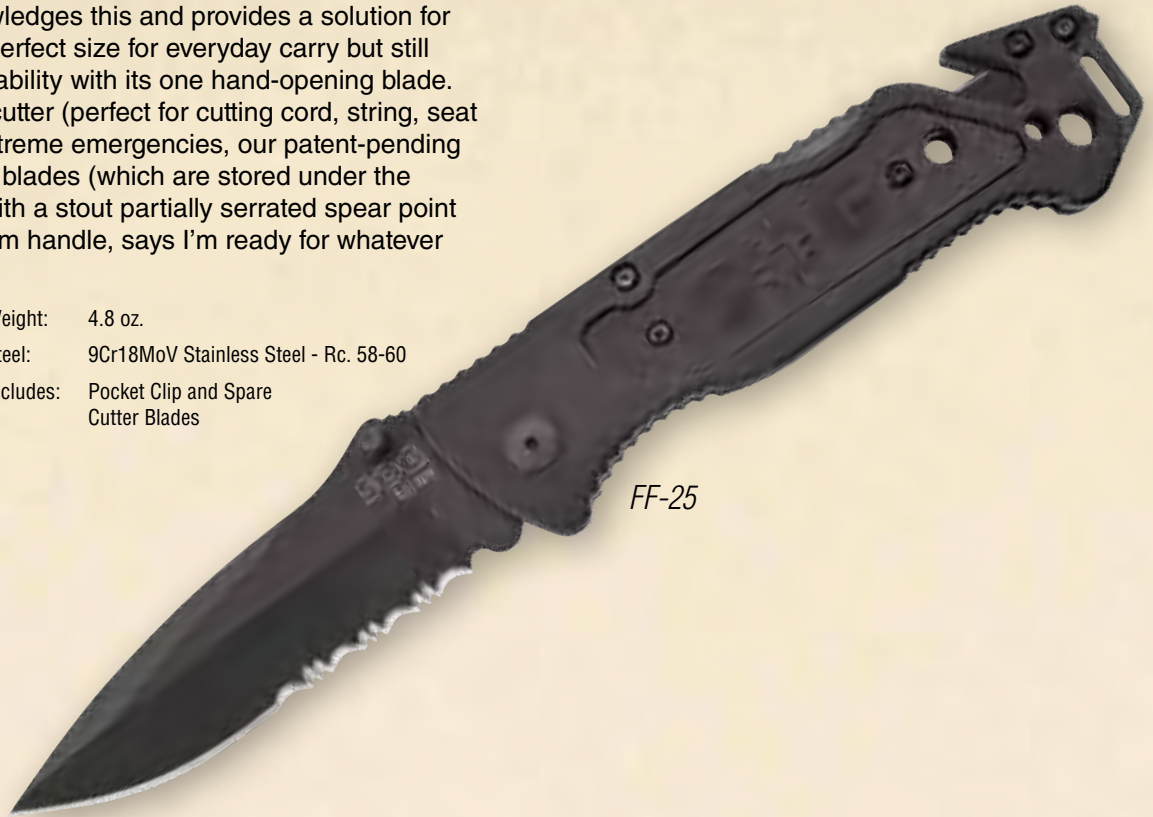

Escape

NEW 1

Don't know about you, but the world seems to be getting more complicated. The Escape acknowledges this and provides a solution for you. As a general knife, it is the perfect size for everyday carry but still has a tremendous amount of capability with its one hand-opening blade. Integrated in the handle is a line cutter (perfect for cutting cord, string, seat belts, etc.), a glass breaker for extreme emergencies, our patent-pending wire stripper, and extra line cutter blades (which are stored under the handle slab). All this combined with a stout partially serrated spear point blade and hard anodized aluminum handle, says I'm ready for whatever might come my way.

Open:	8.2"	Weight:	4.8 oz.
Blade:	3.4" x 0.13"	Steel:	9Cr18MoV Stainless Steel - Rc. 58-60

FF-25

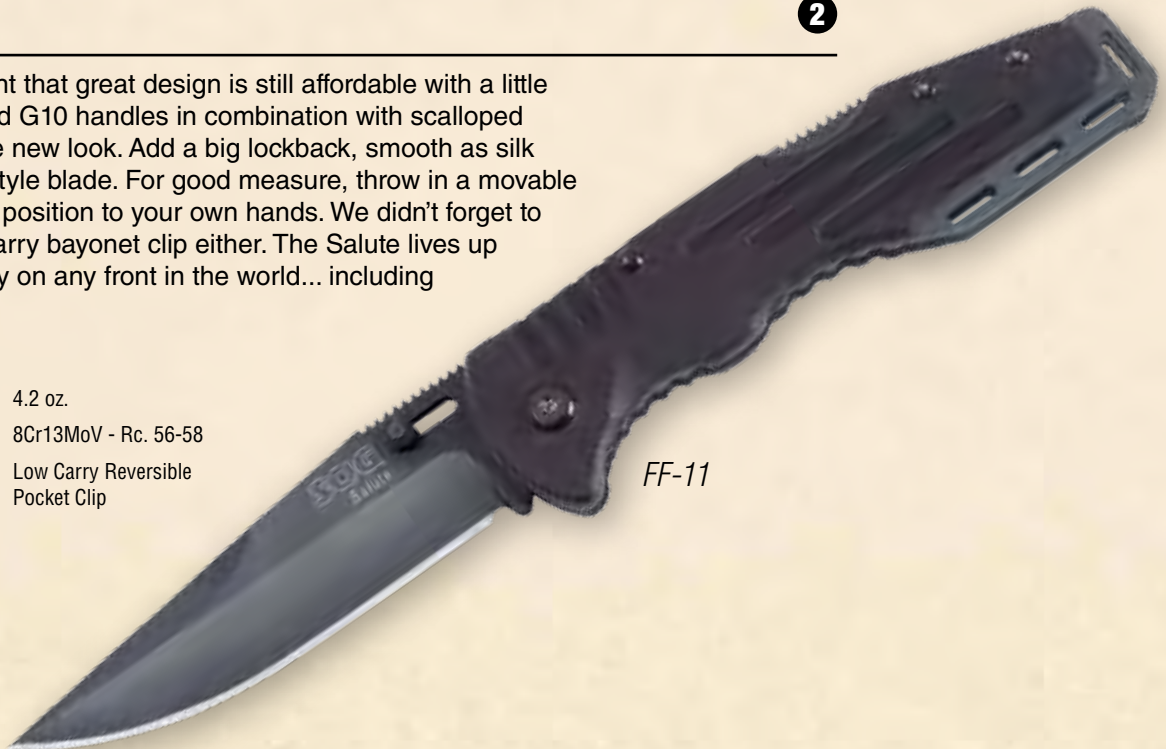

Salute

2

The Salute is an acknowledgment that great design is still affordable with a little perseverance. Take the machined G10 handles in combination with scalloped full-length steel liners for a whole new look. Add a big lockback, smooth as silk operation, and a proven Bowie style blade. For good measure, throw in a movable thumb stud so you can tailor the position to your own hands. We didn't forget to incorporate our trademark low carry bayonet clip either. The Salute lives up to its name and is worthy of carry on any front in the world... including your back yard.

Open:	8.25"	Weight:	4.2 oz.

FF-11

SOGzilla

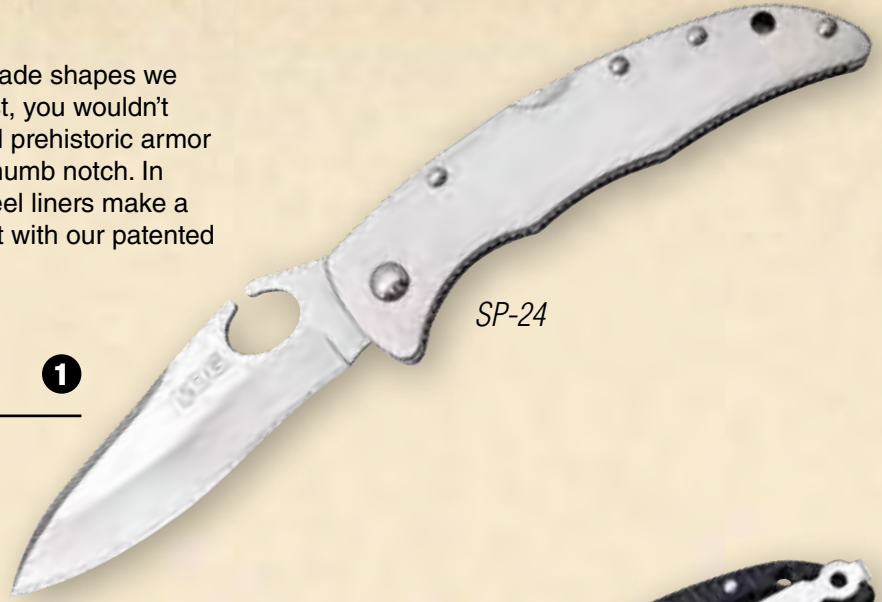

In devising this line, which includes several sizes and blade shapes we wanted to make the SOGzilla distinctive. SOGzilla is fast, you wouldn't want to try and outrun him! The grip is a dual-directional prehistoric armor plate and the big bodied blade features a comfortable thumb notch. In hand, the knife points instinctually and feels familiar. Steel liners make a stout construction. Keep your knife caged in your pocket with our patented low carry reversible clip. SOGzilla... It's a new species.

SOGzilla - Large

AutoClip

You asked and we listened. We have brought back our AutoClip series, a no-nonsense line of lockbacks that are lightweight, durable and affordable. The name comes from our spring-activated clip design, which allows variable thickness of pockets or lapels to be treated equally with the proper clamping force. The next thing you might notice is our adjustable thumbstud (patent-pending) allows you to fine tune its position and tailor it to your hand. Appreciate the AutoClip's signature basket weave texture, which insures non-slip performance. The blades are beautifully ground with a two-directional satin finish, typically only found in much more expensive knives. Several sizes are available to fit your many applications.

Fielder

Introducing the beautiful Fielder series. The contrast of the vertical grain wood against the high-luster bolsters creates a very appealing visual tension. This is a knife that is comfortable as a daily carry or out in the wilds. Using a proven liner lock system provides reliability as well as an ambidextrous opening of the Fielder's capable blade. The Fielder will catch your eye, but not your pocket book.

Fielder Mini

Woodline - Folder

4

That feeling of leaving civilization behind as you move out of the valley and into the wood line is the inspiration for this series of fixed blades and folders. This big upswept blade meets the challenge of extreme camping, hunting and survival chores. The blade folds out of a handle comprised of stainless steel bolsters and beautiful hard wood. The handle configuration insures a solid grip regardless of what nature throws at you. The thumb grooves on the spine allow the application of downward pressure as well as giving greater dexterity. SOG Woodline... a confidence builder in the country where man is the minority.

Open: 8.2" Weight: 5.8 oz.
Blade: 3.4" x 0.12" Steel: 8Cr13MoV - Rc. 57-58
Handle: Wood / Stainless Steel Available in Clam Pack

WD50-L

Magnadot 2.0

5

The Magnadot is a meaty folder. It has substance and you know it when it's in your hand. A traditional and reliable pattern that will give years of reliable use, the Magnadot is more turtle than hare. Easily opening the formidable half serrated blade with one hand gives you a sense of power. Magnadot... it is happening big.

Open: 8.4"	Weight: 4.4 oz.
Blade: 3.63" x 0.154"	Steel: 7Cr17MoV - Rc. 55-57
Handle: GRN	Includes: Nylon Pouch
Clam Pack Only	

S301N-CP

The Magnadot comes with a sturdy nylon pouch in lieu of a pocket clip.

Use the marlin spike on the Nautical for splicing rope, as an awl, a scribe, for digging, prying, scraping and more.

Nautical

6

The Nautical is not just a knife, it's a precision instrument with many parts working together in synchronicity. A marlin-spike is especially useful in marine applications to untie knots, but we were surprised to find out how many other uses they have. Use it for splicing rope, as an awl, a scribe, for digging, prying, scraping, or ... you get the idea. What you might not see at first glance though is that the liners are crafted from super-strong and lightweight titanium and mated to tough G10 handles. The big half serrated blade opens and closes as fast as you can say 'red right return'.

Open: 7.125"	Weight: 4.9 oz.
Blade: 2.875" x 0.1"	Steel: 6Cr12MoV - Rc. 52-55
Handle: G10 with Titanium Liners	Includes: Nylon Pouch
Clam Pack Only	

FF23-CP

Contractor

A craftsman is only as good as his tools. For almost 25 years, SOG has been a leading supplier of knives and tools to the industrial, contractor, and DIY markets. The reason is simply that our products are some of the toughest and we stand behind them with a lifetime guarantee. The Contractor series is designed specifically for tradesmen, including electricians, handymen, and for those who take pride in a job well done. Modernizing traditional patterns, these four knives feature: multi bladed lockback, patent pending holes/notches for stripping wire, aggressive G10 or aluminum grips, as well as razor sharp blades.

Contractor 2x4

5

The Contractor 2x4 breaks ground with a whole different framework! Open or close the blade and see the circular saw turn or rotate the saw and open the blade. Whether you are a contractor, know a contractor, or wished that you didn't... the 2x4 will help on the job... whatever that might be. How many times have you wished to sharpen a pencil without having to walk back in the house? Or try and get that picture level without a level? Want to strip a wire real quick? No worries. Use the patent pending strippers in the handle. Oh yeah, if you ever need that one last lucky nail, we have that too! What to do to drive that nail home... we can't help you there, at least not yet.

Open:	7.5"	Weight:	4.3 oz.
Blade:	3" x 0.125"	Steel:	8Cr13MoV - Rc. 56-58
Handle:	GRN	Includes:	Pocket Clip, Lever, Pencil Sharpener, Wire Strippers and a Lucky Nail

Clam Pack Only

FF01-CP

Make sure it's level every time with the built in leveling bubble on the Contractor 2x4.

Kilowatt

5

Get 'charged up' with the Kilowatt, the first working theme knife designed for the electrician, homeowner, contractor, or anyone who might need to strip wire in a pinch. Three separate systems address wire from fine multi strand all the way up to cable. There is a stripper bar for wire sizes of 10-22, an adjustable spring-loaded UTP/wire stripper in the back, and just in case... our patent pending hole stripper that uses the main blade. Schematic grips, insulator thumb stud, and a blade with receptacle engraving are signatures that make this a very unique liner lock knife.

Open:	7.5"	Weight:	3.3 oz.
Blade:	3.4" x 0.12"	Steel:	AUS-8 - Rc. 57-58
Handle:	GRN	Includes:	Pocket Clip and Wire Strippers

Clam Pack Only

EL01-CP

Wirestripping is made easy with the Kilowatt. features wirestripping ports for wire between 10 and 22 gauge.

SEAL Pup

SEAL Knife Series: After surviving one of the most extensive test and evaluation programs ever undertaken by the U.S. Government that included knives from most U.S. cutlery manufacturers, the SOG SEAL knife triumphed. The SEALs are one of the most specialized elite military groups in the world today. SEALs must undergo one of the most rigorous training programs devised to produce the consummate warrior. Only a select few endure and earn the right to wear the SEAL Trident on their uniform. The knife needed to accompany a Navy SEAL must be just as worthy. The US Government's knife evaluation program included incredible tests that evaluated the following: tip breaking strength, blade toughness, sharpness and edge retention, handle twist off force, two week salt water immersion tests, gasoline and acetylene torch resistance, chopping, hammering, prying, penetration tests, cutting six different types of rope and line, plus an intense hands-on competition in the field.

Nylon sheath for the SEAL Pup & SEAL Pup Elite

Force

The first thing that is obvious about the Force is how stout it is. The thick blade and minimal grind profiles maximize the strength of the blade. This is a beast of a knife and will be virtually unbreakable. The full tang runs out the back of the glass-reinforced handle and into a glass breaking point. The handle is perfectly contoured and covered in aggressive checkering that is not for the faint handed. The Force is recommended for extreme, long duration operations.

Length: 11.25" Weight: 10.5 oz.
Blade: 6" x 0.236" Steel: AUS-8 - Rc. 57-58
Handle: GRN Includes: Nylon Sheath

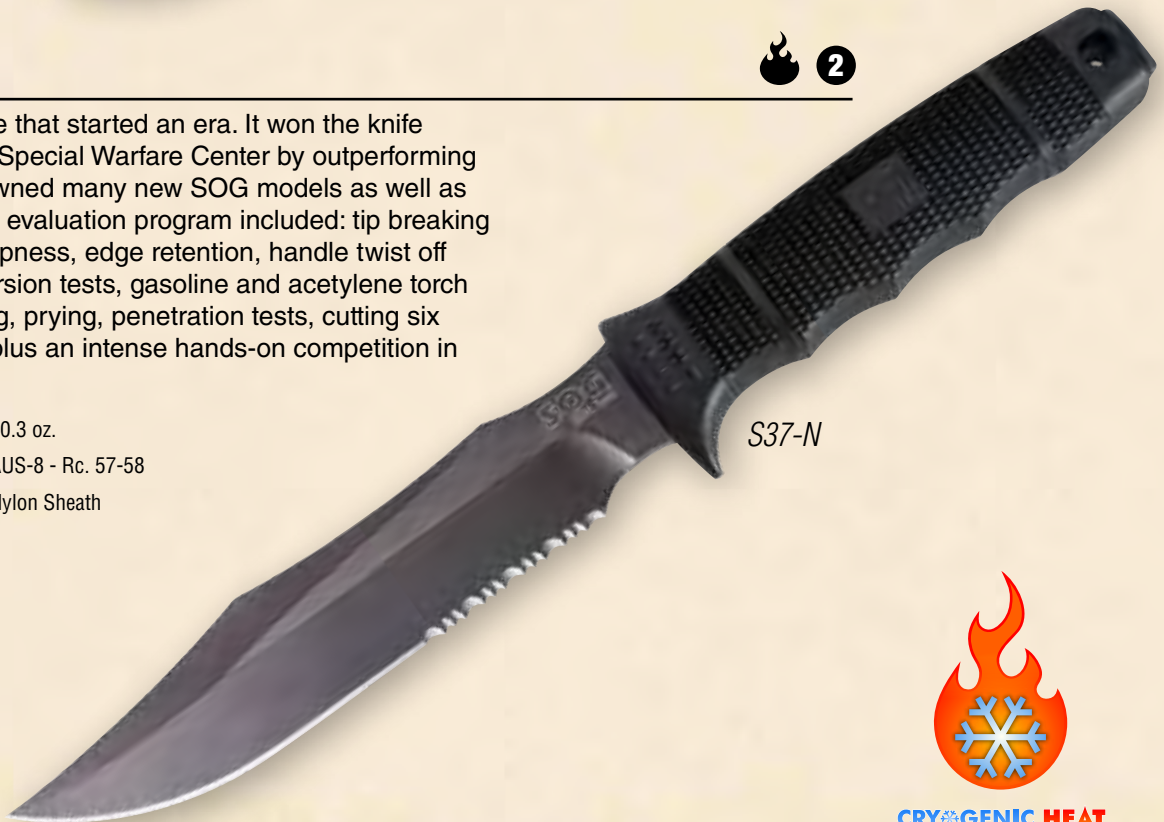

Nylon sheath for the Force also works with the SEAL Team.

SEAL Team

The SEAL Team knife is the knife that started an era. It won the knife competition put on by the Naval Special Warfare Center by outperforming all of the competition. It has spawned many new SOG models as well as many 'wanna bes' by others. The evaluation program included: tip breaking stress, blade breaking limit, sharpness, edge retention, handle twist off force, two week salt water immersion tests, gasoline and acetylene torch resistance, chopping, hammering, prying, penetration tests, cutting six different types of rope and line, plus an intense hands-on competition in the field.

Length: 12.3" Weight: 10.3 oz.
Blade: 7" x 0.24" Steel: AUS-8 - Rc. 57-58
Handle: GRN Includes: Nylon Sheath

CRYGENIC HEAT TREATED

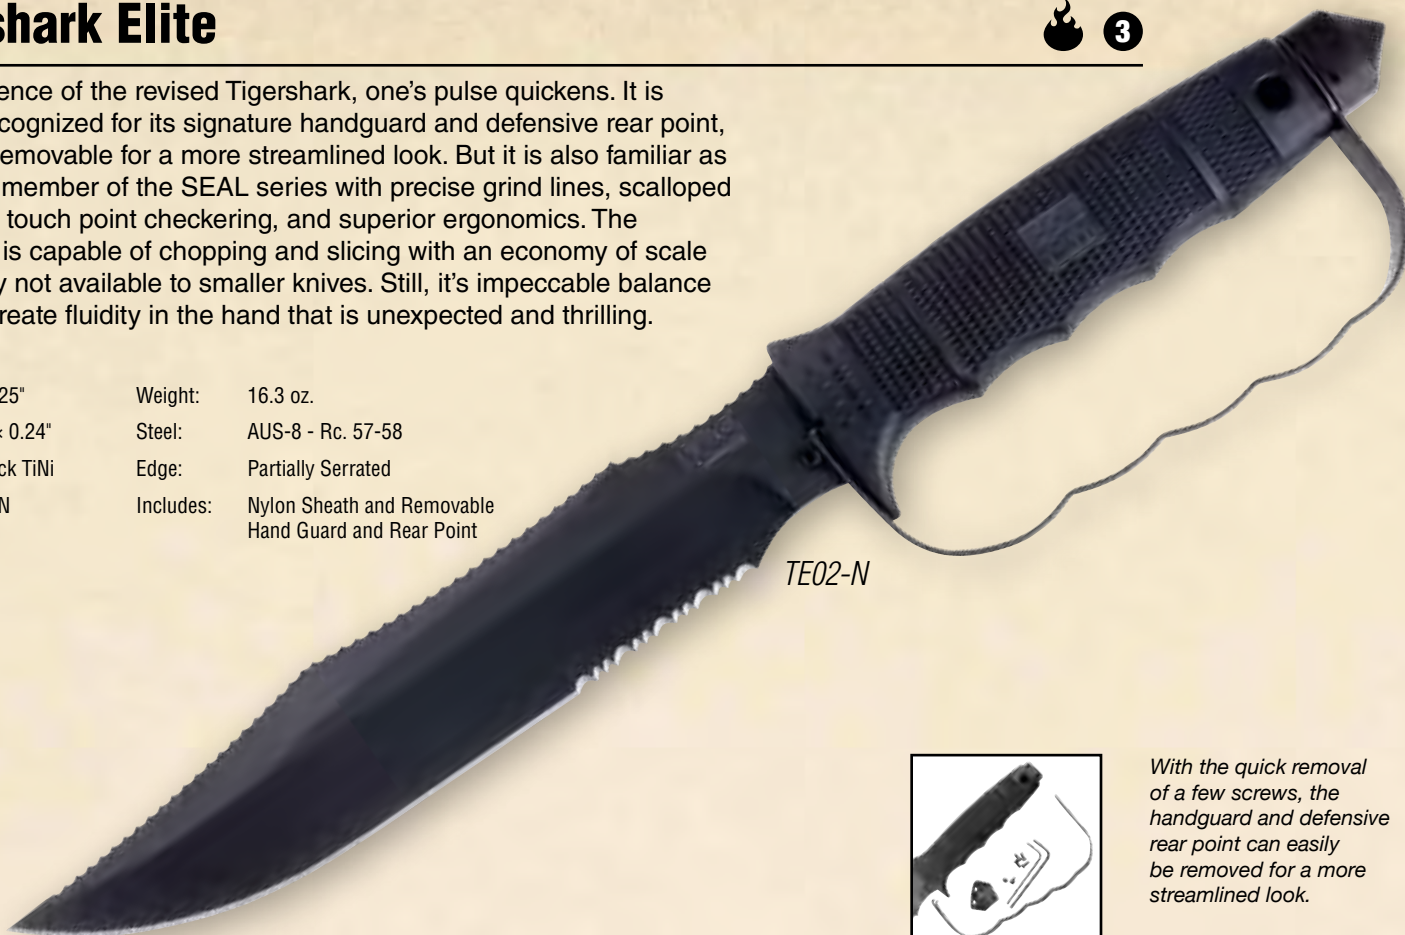

SOG's unique cryogenic heat treatment process increases the toughness and wear resistance of our blades. It also stress relieves the material on an atomic level and increases overall strength as well as edge retention. Knife edges stay sharp longer with significantly less micro-fracturing and edge-chipping. It's this dedication to making your knife SOG sharp that sets us apart from the rest. Look for the Cryogenic Heat Treated logo on selected SOG Knives.

Tigershark Elite

In the presence of the revised Tigershark, one's pulse quickens. It is instantly recognized for its signature handguard and defensive rear point, which are removable for a more streamlined look. But it is also familiar as the largest member of the SEAL series with precise grind lines, scalloped back edge, touch point checkering, and superior ergonomics. The Tigershark is capable of chopping and slicing with an economy of scale and ferocity not available to smaller knives. Still, it's impeccable balance and style create fluidity in the hand that is unexpected and thrilling.

Length:	15.25"	Weight:	16.3 oz.
Blade:	9" x 0.24"	Steel:	AUS-8 - Rc. 57-58
Finish:	Black TiNi	Edge:	Partially Serrated
Handle:	GRN	Includes:	Nylon Sheath and Removable Hand Guard and Rear Point

TE02-N

With the quick removal of a few screws, the handguard and defensive rear point can easily be removed for a more streamlined look.

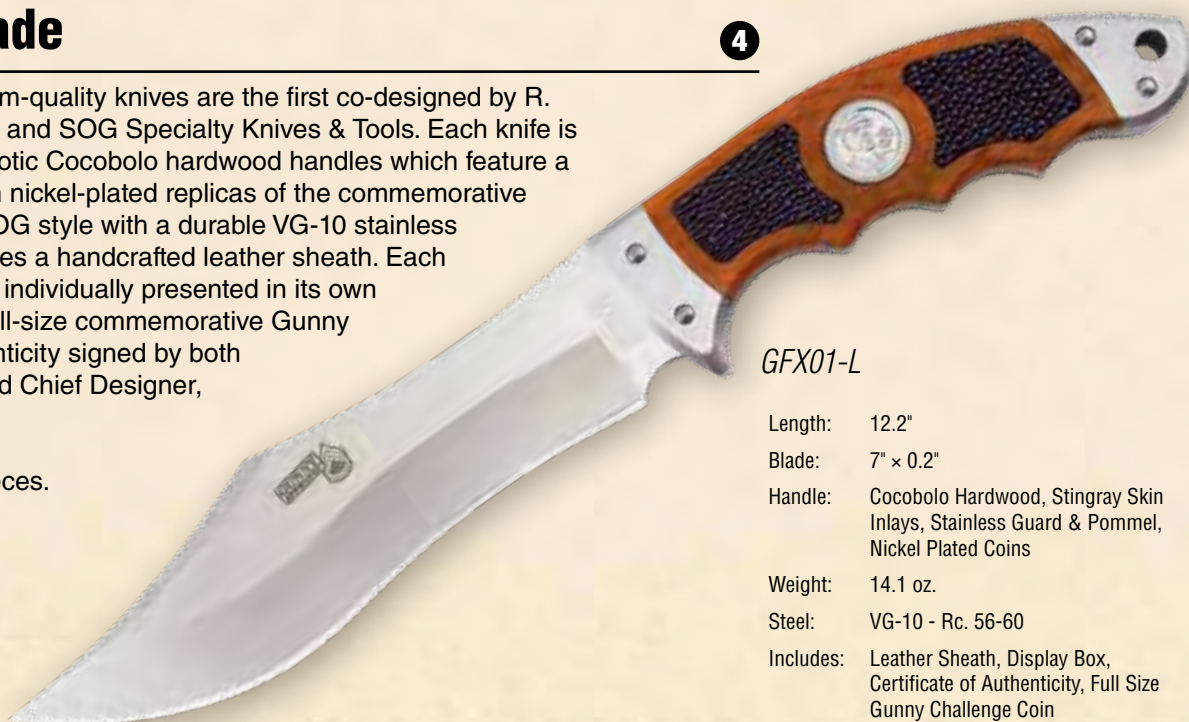

Gunny Fixed Blade

These limited edition, heirloom-quality knives are the first co-designed by R. Lee Ermey, aka "The Gunny," and SOG Specialty Knives & Tools. Each knife is meticulously crafted using exotic Cocobolo hardwood handles which feature a stingray hide inlay, along with nickel-plated replicas of the commemorative Gunny coin. Paired in true SOG style with a durable VG-10 stainless steel blade, each knife includes a handcrafted leather sheath. Each limited edition Gunny knife is individually presented in its own beautiful walnut box with a full-size commemorative Gunny coin and Certificate of Authenticity signed by both Ermey and SOG Founder and Chief Designer, Spencer Frazer.

Limited to 1000 serialized pieces.

For more information about the Gunny series of knives, including the Gunny Folding knife, visit page 37.

GFX01-L

Length:	12.2"
Blade:	7" x 0.2"
Handle:	Cocobolo Hardwood, Stingray Skin Inlays, Stainless Guard & Pommel, Nickel Plated Coins
Weight:	14.1 oz.
Steel:	VG-10 - Rc. 56-60
Includes:	Leather Sheath, Display Box, Certificate of Authenticity, Full Size Gunny Challenge Coin

Pentagon

Originally designed as back-up for law enforcement and military personnel, the Pentagon series is now popular with outdoor knife enthusiasts as well. These redesigned and improved knives offer an instant choice between a serrated or beveled edge for cutting options. Twin thumb notches enable accurate blade orientation and downward control. The aggressively checkered, flared handles provide confident gripping as well as sensational feel and balance.

Pentagon

1

Length:	9.75"	Weight:	5.6 oz.
Blade:	5" x 0.125"	Steel:	AUS-8 - Rc. 57-58
Handle:	Kraton	Includes:	Nylon Sheath

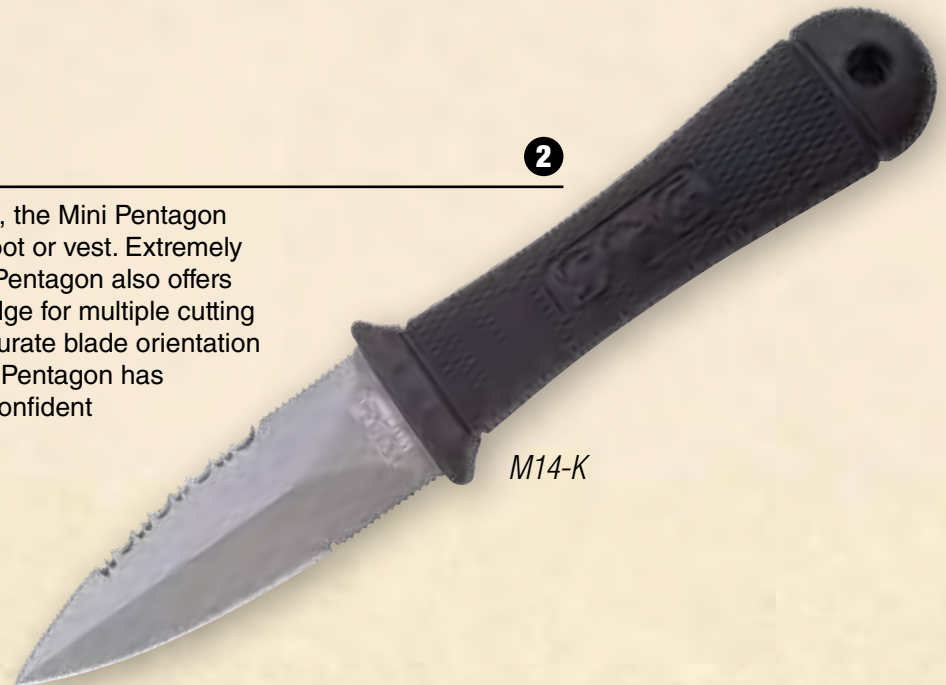

Pentagon Mini

2

The compact version of the original SOG Pentagon, the Mini Pentagon is a serious back-up knife that easily conceals in boot or vest. Extremely lightweight and comfortable to maneuver, the Mini Pentagon also offers the instant choice between a straight or serrated edge for multiple cutting tasks. Twin thumb notches on the blade enable accurate blade orientation and downward control. Like its big brother, the Mini Pentagon has aggressively checkered, flared Kraton handles for confident gripping as well as sensational feel and balance.

Length:	7.875"	Weight:	3.3 oz.
Blade:	3.625" x 0.125"	Steel:	AUS-8 - Rc. 57-58
Handle:	Kraton	Includes:	Kydex Sheath

Available in Clam Pack

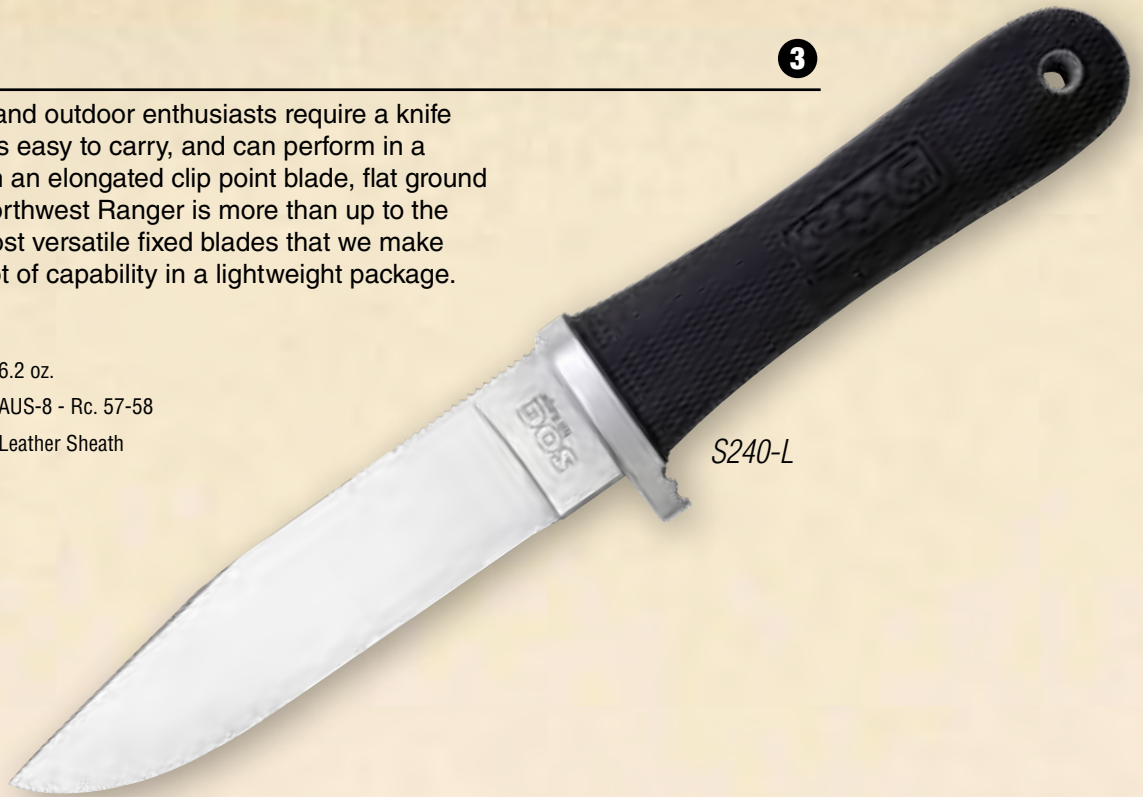

NW Ranger

3

Sportsmen, fishermen, hunters, and outdoor enthusiasts require a knife that can fulfill a variety of tasks, is easy to carry, and can perform in a wide range of environments. With an elongated clip point blade, flat ground bevels, and compact size, the Northwest Ranger is more than up to the task. This might be one of the most versatile fixed blades that we make and you will find that it packs a lot of capability in a lightweight package.

Length: 9.925"	Weight: 6.2 oz.
Blade: 5.2" x 0.15"	Steel: AUS-8 - Rc. 57-58
Handle: Kraton	Includes: Leather Sheath

Available in Clam Pack

S240-L

Tsunami

4

With the reintroduction of this popular SOG knife, we have taken what made the Tsunami so great and improved it. Some of the changes are subtle- like refining the overall balance. Some are more obvious, like the grooves in our crossguards. Finally, the beautiful Tsunami blade shape is mated perfectly with an extremely tactile diamond checked Kraton handle. Experience this next generation of a great classic!

Length: 10.9"	Weight: 6.8 oz.
Blade: 6.5" x 0.15"	Steel: AUS-8 - Rc. 57-58
Handle: Kraton	Includes: Nylon Sheath

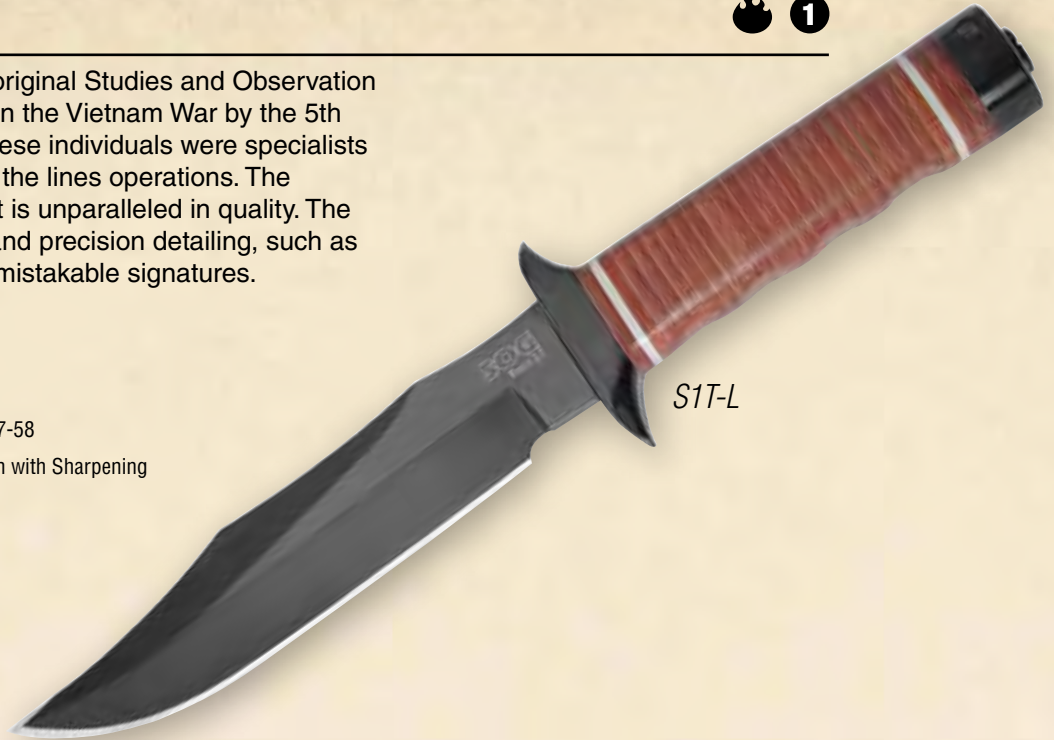

TS01-N

Bowie 2.0

The Bowie 2.0 is a modern replica of the original Studies and Observation Group knife secretly developed and used in the Vietnam War by the 5th Special Forces and other elite soldiers. These individuals were specialists in reconnaissance, infiltration, and behind the lines operations. The SOG Bowie 2.0 has become a classic that is unparalleled in quality. The sculpted crossguard, deep hollow grinds and precision detailing, such as the all TiNi coating, and faceted tip are unmistakable signatures.

Length:	11"	Weight:	11.2 oz.
Blade:	6.4" x 0.24"	Steel:	AUS-8 - Rc. 57-58
Handle:	Stacked Epoxied Leather Washers	Includes:	Leather Sheath with Sharpening Stone

S1T-L

Super SOG Bowie

How appropriate that for our 20th anniversary we launched a new adaptation of the original SOG Bowie that founded the company. This large format 7-1/2" blade will stun you with its exacting construction and precise grind lines. Unlike the originals, all parts are protected with our Black TiNi Hardcased coating that is the very best for appearance and performance. The stacked leather washer handle is completely traditional. SOG today is 25 plus years smarter and our products show it.

Length:	12.875"	Weight:	17.4 oz.
Blade:	7.5" x 0.25"	Steel:	AUS-8 - Rc. 57-58
Handle:	Stacked Epoxied Leather Washers	Includes:	Leather Sheath with Sharpening Stone

SB1T-L

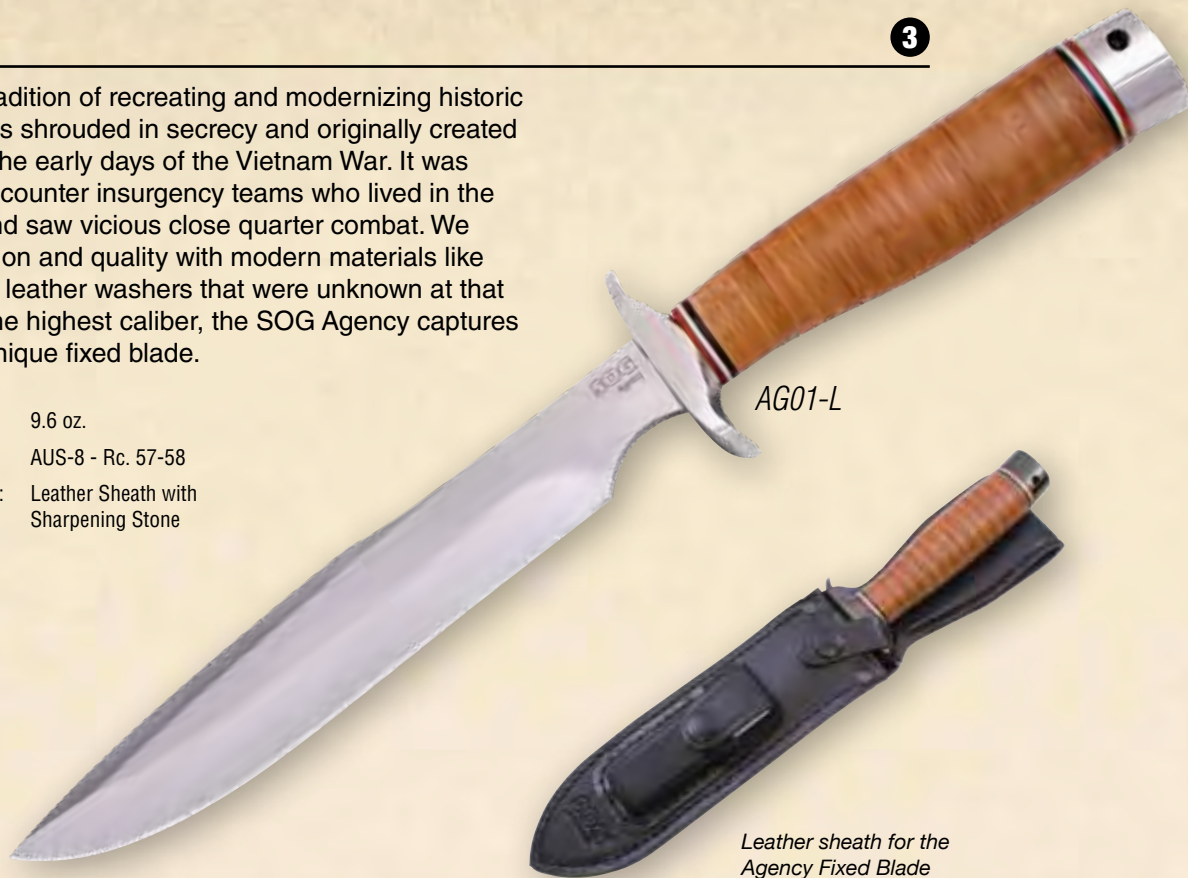

Agency

3

The Agency follows a SOG tradition of recreating and modernizing historic classics. This unique knife was shrouded in secrecy and originally created for special CIA operatives in the early days of the Vietnam War. It was designed for clandestine and counter insurgency teams who lived in the jungle for months at a time and saw vicious close quarter combat. We vastly improved the construction and quality with modern materials like TiNi coatings and epoxy filled leather washers that were unknown at that time. An exquisite design of the highest caliber, the SOG Agency captures the mystique of a positively unique fixed blade.

Length:	12.675"	Weight:	9.6 oz.
Blade:	7.5" x 0.15"	Steel:	AUS-8 - Rc. 57-58
Handle:	Stacked Epoxied Leather Washers	Includes:	Leather Sheath with Sharpening Stone

Trident 2.0

4

For those who are looking for the style of the SOG Bowie in a stainless steel design, look no further than the Trident. Our Trident embodies the spirit of our most capable special forces unit, the Navy SEALs.

Length:	11"	Weight:	11.2 oz.
Blade:	6.4" x 0.24"	Steel:	AUS-8 - Rc. 57-58
Handle:	Micarta Washers	Includes:	Leather Sheath with Sharpening Stone

S2B-L

Tech Bowie

The Tech Bowie is based on the classic SOG Bowie that founded our company, but morphed into a top-notch work knife with the use of technology, modern materials, and a little class thrown in for good measure.

Length: 11" Weight: 11.2 oz.
Blade: 6.4" x 0.24" Steel: AUS-8 - Rc. 57-58
Handle: Kraton Includes: Kydex Sheath

S10B-K

Creed

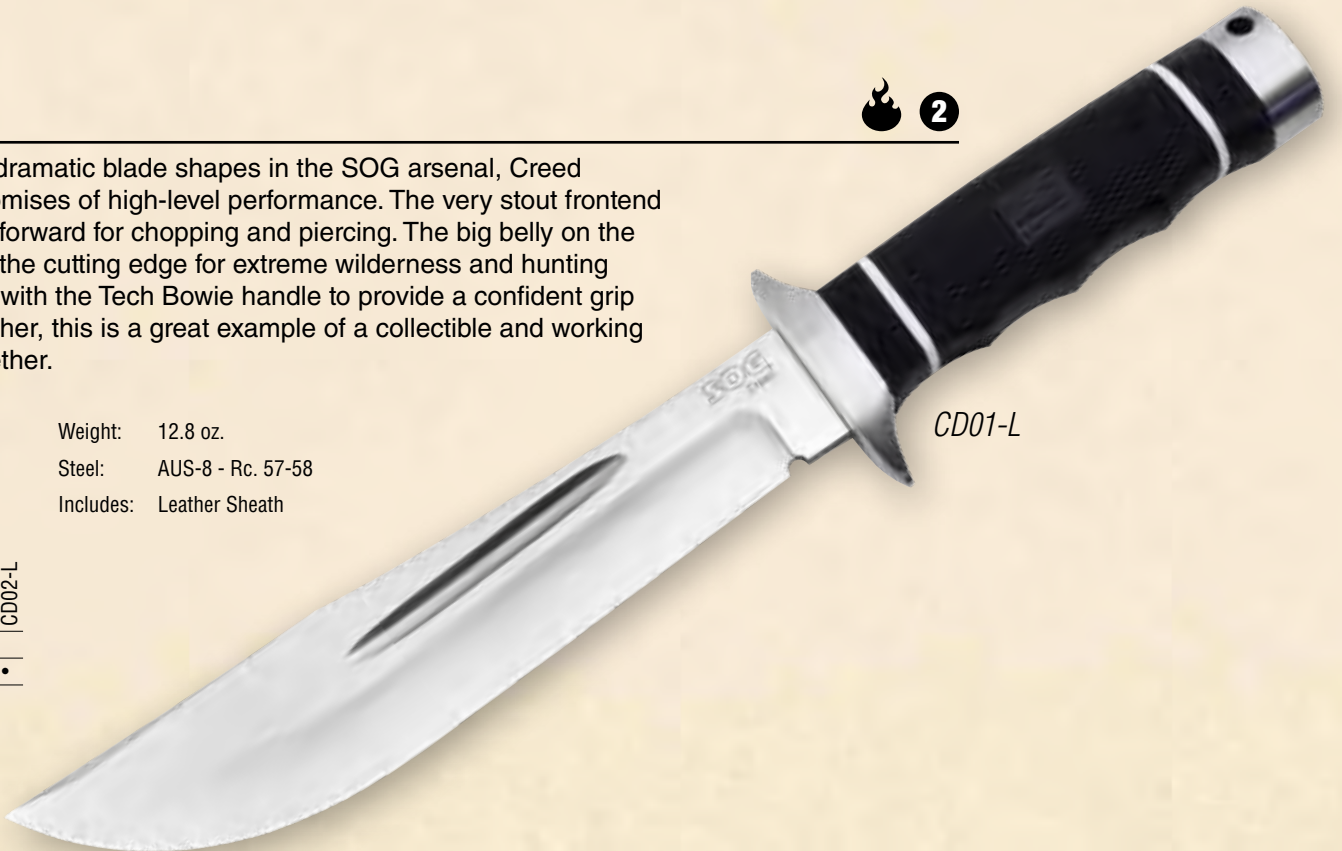

One of the more dramatic blade shapes in the SOG arsenal, Creed delivers on its promises of high-level performance. The very stout front end weights the knife forward for chopping and piercing. The big belly on the blade maximizes the cutting edge for extreme wilderness and hunting situations. Mated with the Tech Bowie handle to provide a confident grip in inclement weather, this is a great example of a collectible and working knife coming together.

Length: 12.125" Weight: 12.8 oz.
Blade: 7.5" x 0.24" Steel: AUS-8 - Rc. 57-58
Handle: Kraton Includes: Leather Sheath

Demo 2.0

The SCUBA/DEMO is the rarest of the Special Forces SOG knives. In fact, only one original is known to exist today. Originally, 39 were made and 38 were delivered to the Naval Advisory Detachment for missions along the North Vietnamese coastline. Of the 38 issued, 36 were lost in operations and the other two were never seen again. Using current manufacturing techniques we are now able to create a spectacular reproduction of this ultra-rare knife and modernized it as well.

Length:	11.75"	Weight:	12.2 oz.
Blade:	7.25" x 0.228"	Steel:	AUS-8 - Rc. 57-58
Handle:	Kraton	Includes:	Leather Sheath

SSD01-L

Recon Bowie 2.0

The original Recon was the first knife developed and procured by SOG personnel in the Vietnam War. It was designed for SOG's clandestine cross-border Recon team which experienced vicious, close-quarter combat. We have taken this highly collectable classic design and updated with it with modern materials like stainless steel, rubber handles and black TiNi coating. The Recon Bowie 2.0 captures the essence of this positively unique blade.

Length:	11.25"	Weight:	11.1 oz.
Blade:	6.75" x 0.228"	Steel:	AUS-8 - Rc. 57-58
Handle:	Kraton	Includes:	Leather Sheath

SRB01-L

Forge

1

The SOG Forge evokes a period in Japanese history when honor was the most highly coveted virtue; It was a time when everything was handmade with meticulous care. A good knife or sword was meant to last for lifetime- and as such, the Forge is built using both traditional and modern methods. It projects a dual sense of elegance and sophistication. The VG-10 san mai blade is hammer-forged creating the distinctive pattern, and the handle is precisely fitted using a stepped topographic design for exemplary balance and feel. And because no detail is overlooked, the sheath is as good as the knife- crafted in Japan from thick rich leather, with a splash design of beautiful silk stitched into its face to make each one of a kind.

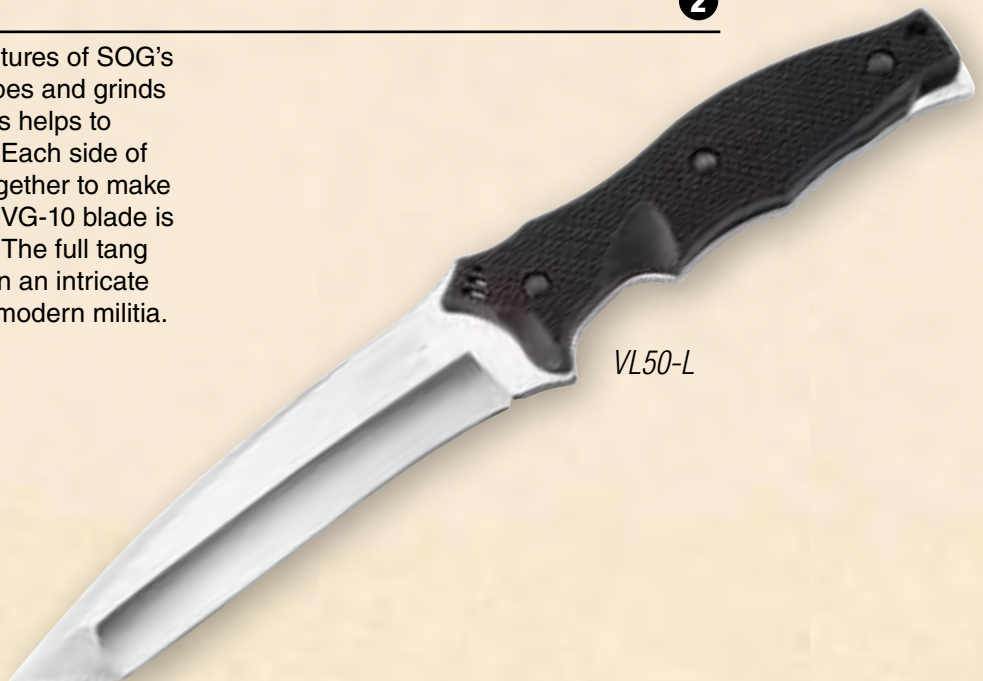

Length: 10.875"	Weight: 10.1 oz.
Blade: 6" x 0.2"	Steel: san mai VG-10 - Rc. 59-60
Handle: GRN	Includes: Leather Sheath

The leather sheath for the Forge includes fine Japanese print detailing.

Vulcan Fixed Blade

2

Radical blade grinds have been one of the signatures of SOG's knives, but to produce these complex blade shapes and grinds requires the finest attention to detail. Perhaps this helps to explain why the Vulcan fixed blade is so special. Each side of the knife has three separate grinds that come together to make a strong powerful knife. The reverse curve in the VG-10 blade is further evidence of this masterful craftsmanship. The full tang blade is clad with GRN scales that are textured in an intricate wave pattern. The premiere tactical knife for the modern militia.

Length: 10.43"	Weight: 8.4 oz.
Blade: 5.3" x 0.175"	Steel: VG-10 - Rc. 59-60
Handle: GRN	Includes: Leather Sheath

Fixation

Among other things, SOG has a reputation for producing some of the finest production fixed blades in the world. Now we have developed along with military consultants an even more economical choice with the Fixation series. Seamless fits between blade and cross guard, wrap-around checkered handles, blade grooves, thumb notches, spanner nuts, and crossguard cutouts all say this knife is as distinctive as you are. Great balance and proportion make these knives very agile. Let our Fixation become yours!

Fixation Bowie 3

Length:	12.25"	Weight:	10.5 oz.
Blade:	7" x 0.2"	Steel:	8Cr13MoV - Rc. 57-58
Handle:	Kraton	Includes:	Nylon Sheath

Available in Clam Pack

Fixation Dagger 4

Open:	11.875"	Weight:	8.3 oz.

Handle:	Kraton	Includes:	Nylon Sheath

Available in Clam Pack

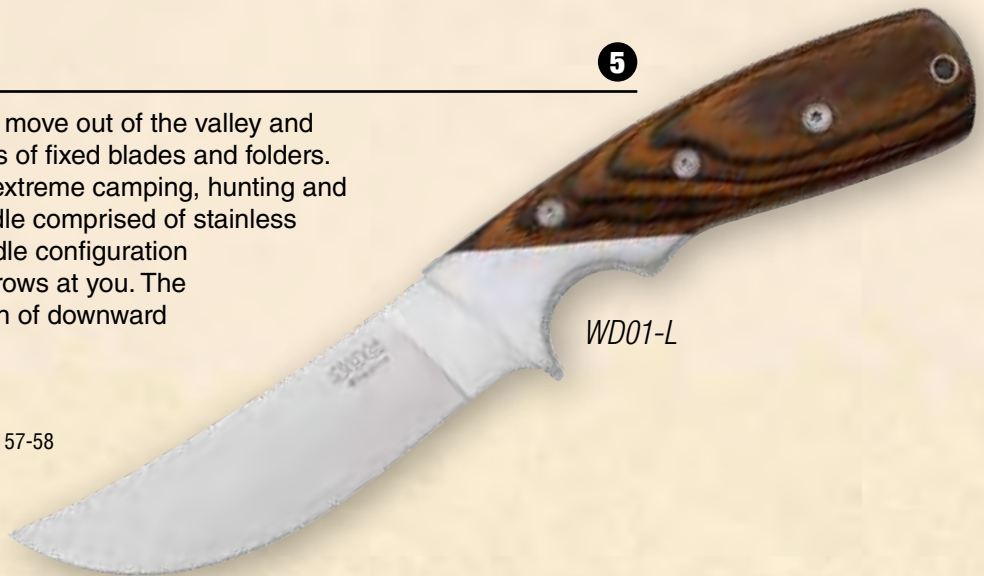

Woodline Fixed Blade 5

That feeling of leaving civilization behind as you move out of the valley and into the wood line is the inspiration for this series of fixed blades and folders. This big upswept blade meets the challenge of extreme camping, hunting and survival chores. The blade is anchored in a handle comprised of stainless steel bolsters and beautiful hard wood. The handle configuration insures a solid grip regardless of what nature throws at you. The thumb grooves on the spine allow the application of downward pressure as well as giving greater dexterity.

Length:	10.4"	Weight:	8.3 oz.
Blade:	4.8" x 0.15"	Steel:	8Cr13MoV - Rc. 57-58
Handle:	Wood / Stainless Steel	Includes:	Leather Sheath

Available in Clam Pack

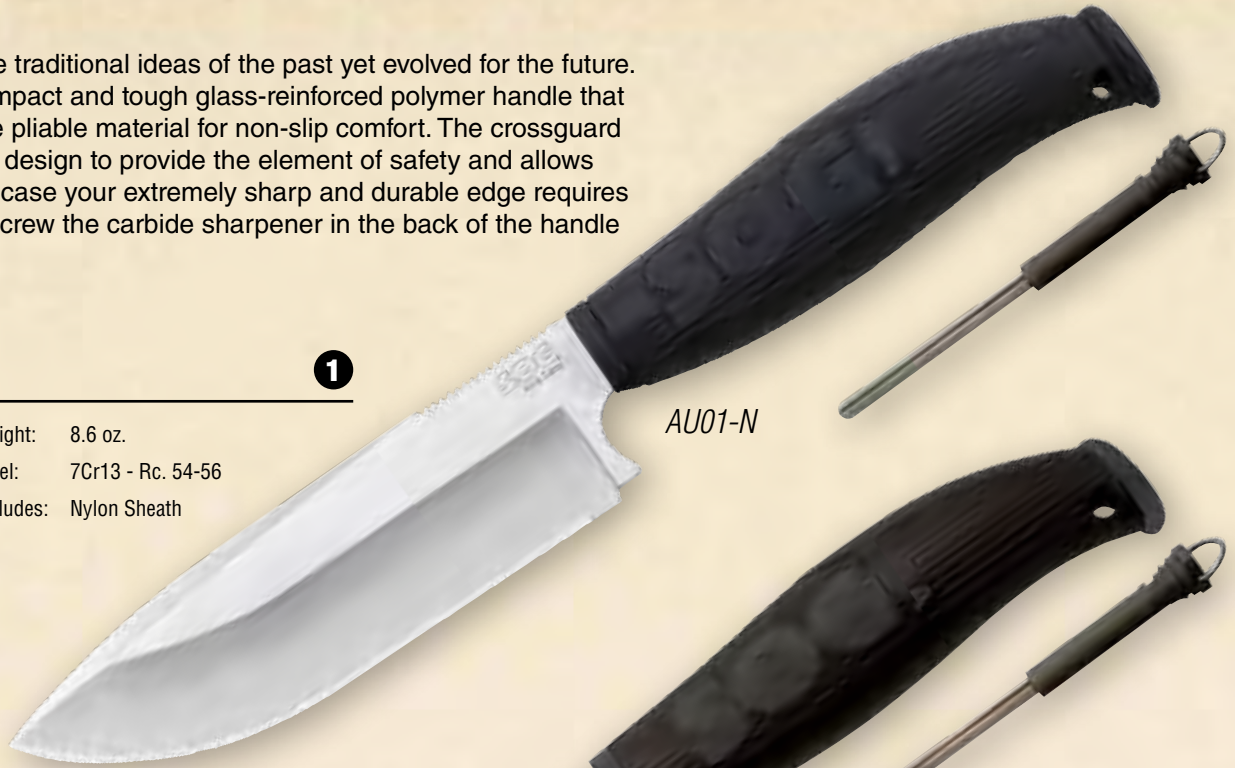

Aura

The Aura line is built on the traditional ideas of the past yet evolved for the future. The Aura features a high impact and tough glass-reinforced polymer handle that is over molded with a more pliable material for non-slip comfort. The crossguard is integrated into the blade design to provide the element of safety and allows greater control. And just in case your extremely sharp and durable edge requires a touch up in the field. Unscrew the carbide sharpener in the back of the handle for a quick touch up.

Aura Camp 1

Length: 10.95"	Weight: 8.6 oz.

Available in Clam Pack

AU03-N

Each Aura knife features a handy miniature sharpener built right into the handle.

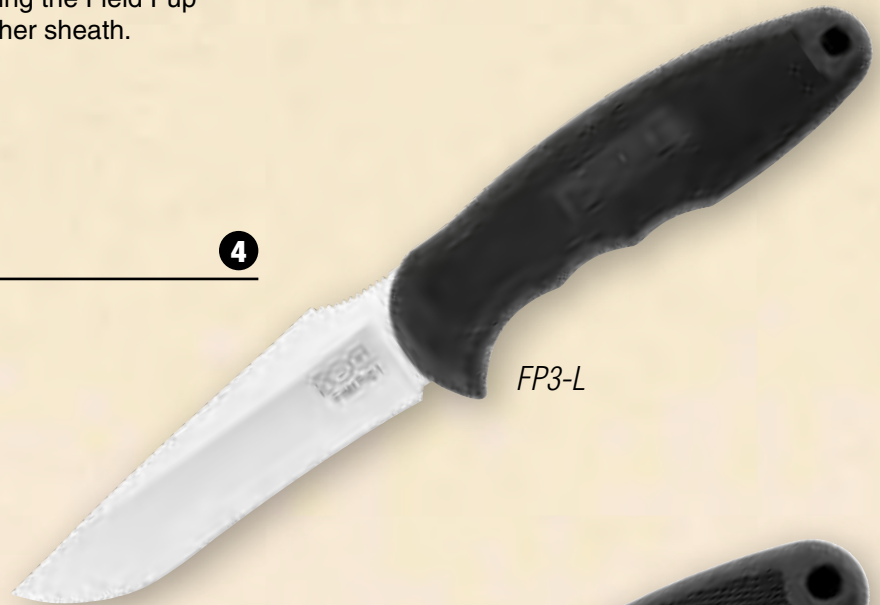

Field Pup

"It's just about the perfect size, weight, feel and balance," is the comment we hear from wilderness guides who handle the Field Pup for the first time. It's comfortable to use with its Kraton molded handle that form fits the full tang blade. SOG's trademarked finger grips are combined with aggressive thumb notches on the back of the blade, making the Field Pup a real working knife. The blade is also protected by a leather sheath.

Revolver Series

It isn't very often that a product can create a new category, but the Revolver does just that. We have pioneered a fixed blade with a new twist... actually a complete revolution. The Revolver's secret is simply twice the capability for the same size and weight. Utilizing patented technology developed by Robbie Roberson and Spencer Frazer, you can depress the locking lever and rotate the blade to transform the knife into a saw. It's so easy, so cool, that you'll wonder why it wasn't done a long time ago.

Revolver Hunter

Length:	10"	Weight:	6 oz.

Jungle Knives

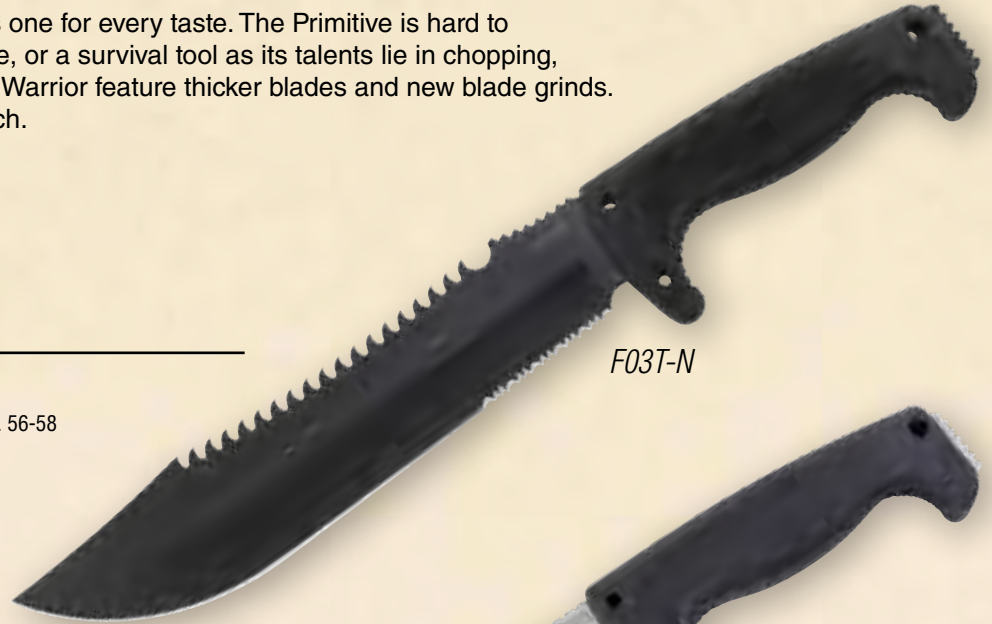

For the primitive in all of us. When the only thing that separates you from them is your equipment, it better be good. The Jungle series is durable and comfortable with a molded Kraton handle that features our trademark Digi-Grip handle texture, a way to guarantee gripping power where you need it.

Now with three distinctive blade shapes there is one for every taste. The Primitive is hard to categorize between a big knife, a small machete, or a survival tool as its talents lie in chopping, slicing, sawing, pounding, etc. The Canopy and Warrior feature thicker blades and new blade grinds. All three include a Nylon sheath with utility pouch.

Don't be caught alone!

Jungle Primitive

Length:	15.3"	Weight:	14 oz.
Blade:	9.5" × 0.15"	Steel:	8Cr13MoV - Rc. 56-58

Blade: 18" x 0.08"	Steel: 3Cr13
Handle: Kraton	Includes: Nylon Sheath
Clam Pack Only	

SOGFari Machete

These machetes are exciting additions to the SOG family. It's not 'should I have a machete' but 'which size will work for me! Machetes are one of the more useful edged tools in the world. They have cleared brush, and blazed trails, have chopped wood, made shelters, harvested crops, prepared meals, hunted and protected. Careful attention has been given to the SOGFari to make sure that the weight was right and the handles were comfortable for extended use. Whip them through the air and hear them sing. We've added a real working saw on the back of the blades with teeth that cut deep. Extended out of the back of the handle is a spiked tang for pounding and scraping. There are even holes in the handle to mount lanyards. SOGFari... the go-to tool for survival, exploration and adventure!

SOGFari Machete includes a nylon sheath with SOG embroidery.

F01T-N

Molded Hard Nylon sheath available for both Tactical Tomahawk FastHawk

Tactical Tomahawk

Based on the Vietnam Tomahawk, the new Tactical Tomahawk is an extreme evolution of the original which was considered one of the more unusual weapons of its day. Today there is a real need for a versatile tool for breaching operations, excavation, obstacle removal, extraction, and other utility applications. The 420 stainless steel head with Hard cased coating is mounted to the fiberglass reinforced nylon handle with heavy-duty bolts and a steel ferrule for stability. Side hammer checkering insures precise placement when pounding.. Carry in a nylon sheath this is a universal tool for modern man.

Battle Axe

Our modern battle/throwing axe evokes its origins from medieval times. Whether used as a target axe, SWAT tool, universal back up, or hung above the fireplace; it is very effective. The pike in the back is upswept for better target penetration. Size and heft are balanced for optimum swing control. The handle is sculpted from heavy duty black G10 and the entire solid blade is protected with SOG's Hardcased black coating.

Open: 12.25"
Blade: 3.75"
Handle: G10

Weight: 20.2 oz.
Steel: 420 Stainless - Rc. 51-53
Includes: Nylon Sheath

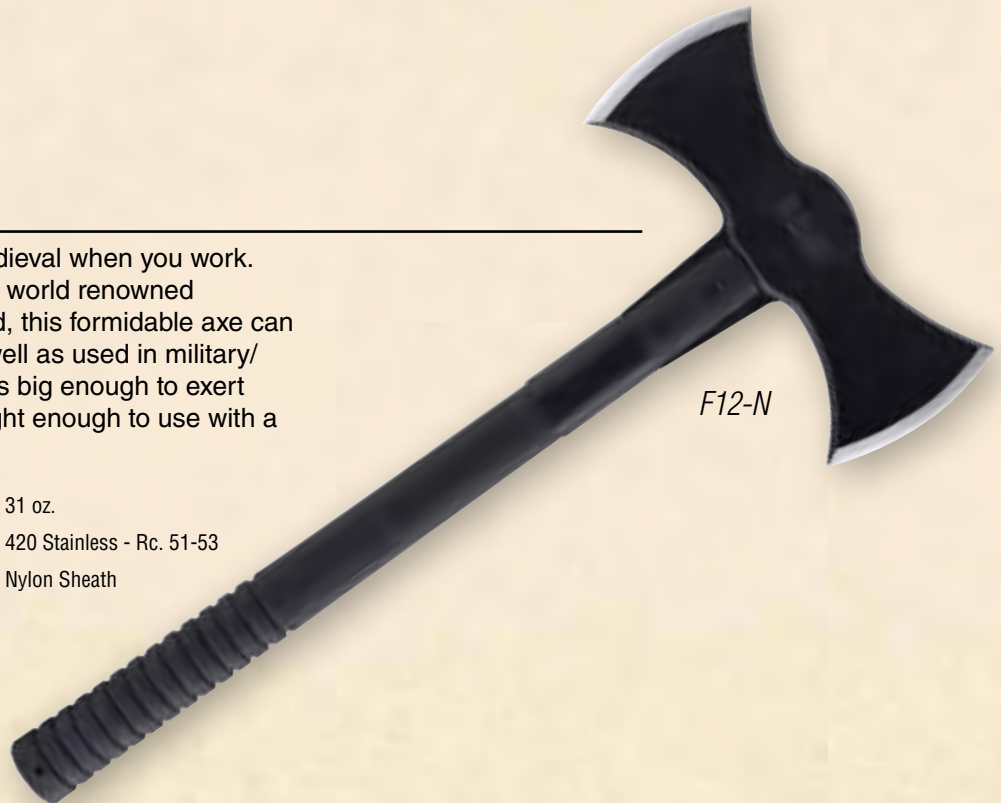

Double Headed Axe

The SOG Double Headed Axe lets you get medieval when you work. Based on the construction and durability of the world renowned Tomahawk, but with a heavier two-edged head, this formidable axe can shape, split and cut wood, harvest timber, as well as used in military/LE operations for breaching, extraction, etc. It is big enough to exert significant power with a two-handed grip but light enough to use with a single hand.

Open: 17.25"
Blade: 3.25"
Handle: GRN

Weight: 31 oz.
Steel: 420 Stainless - Rc. 51-53
Includes: Nylon Sheath

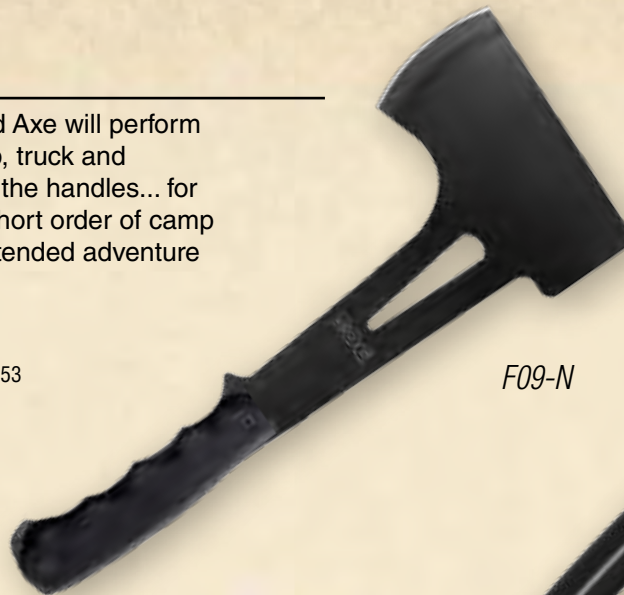

Hand Axe

A simple and genuine utilitarian design, the SOG Hand Axe will perform as a wilderness back pack essential as well as a camp, truck and preparedness tool. We opted to include G10 scales on the handles... for a more aggressive grip. With enough weight to make short order of camp chores, it also will not punish you when carrying on extended adventure trip.

Open:	11.1"	Weight:	18.6 oz.
Blade:	2.4"	Steel:	420 Stainless - Rc. 51-53
Handle:	G10	Includes:	Nylon Sheath

Available in Clam Pack

F09-N

Entrenching Tool

A folding shovel can be an indispensable tool in today's constantly changing environment. We know one thing, when you need to move sand, dirt or snow you wish you had that shovel close at hand. Our all-steel construction entrenching tool uses a tempered steel blade with teeth cut into it for cutting and slashing. The triangular handle is strong and fits the hand well. Folded, it takes up about the same space as a stack of paper plates. Which would you rather have?

Open:	18.25"
Blade:	N/A"
Handle:	High Carbon Steel
Weight:	24.5 oz.
Steel:	High Carbon Steel
Includes:	Nylon Sheath

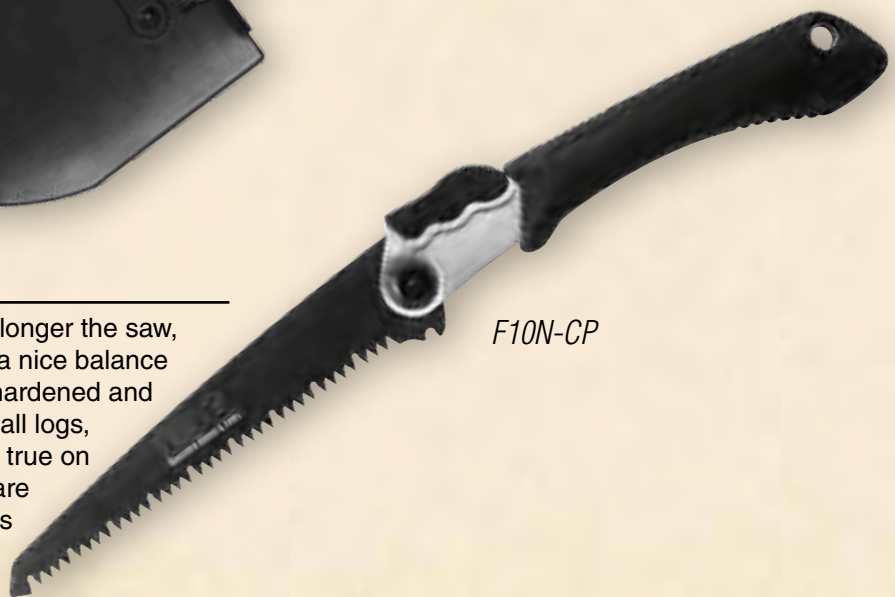

F08-N

Folding Saw

A saw is an essential piece of survival equipment. The longer the saw, the easier to use, but the harder to carry. We achieved a nice balance between the two. The Folding Saw has a 7.5" blade of hardened and tempered steel that makes short order of branches, small logs, and brush. A comfortable handle helps to cut deep and true on each and every pull stroke. The extremely sharp teeth are differentially tempered for long life and work on green as well as hard wood.

Open:	17.25"	Weight:	5.9 oz.
Blade:	8.25"	Steel:	High Carbon Steel
Handle:	High Carbon Steel w/Soft Grip TRP	Includes:	Nylon Sheath

Clam Pack Only

F10N-CP

Spirit Knife

The Spirit looks like a futuristic tribal spear taking off from "Area 51"! Sleek and aerodynamic, it hides a secret... Unscrew the handle and use a broom handle* to complete the spear! In a survival situation, use a branch to make the spear shaft and tighten it with a nail or the provided setscrew. With the provided handle the Spirit can be thrown or used as a cutting tool.

* The Spirit will fit on most common broom handles

Open:	10.65"	Weight:	10 oz.
Blade:	4.25"	Steel:	420 Stainless - Rc. 51-53
Handle:	Glass-Reinforced Nylon	Includes:	Nylon Sheath

Available in Clam Pack

FS01-N

Throwing Knives

These stylized knives are not only fun to sail through the air, they are practical as well. Completely protected by SOG's Hardcased black coating, they are extremely scratch resistant. Their balance, aerodynamics, and proportions make them great throwing knives. For the same reasons they also make great back-up field knives. Wrap the handles with paracord or use as is and you have three knives for the price of one! Includes nylon sheath that safely carries all three.

Length:	10"	Weight:	10 oz.
Blade:	4.375" x .135"	Steel:	420 Stainless - Rc. 51-53
Handle:	N/A	Includes:	Nylon Sheath

Clam Pack Only
Sold in pack of three

F04TN-CP

Countertop Sharpener

Now SOG takes the hassle out of knife sharpening with the newest generation of SOG Countertop Sharpener! Simply set the SOG Countertop Sharpener on any flat non-porous surface, activate the suction, and pull your knives through for a razor sharp edge!

Handle: Glass-Reinforced Nylon

Weight: 3 oz.

SH-02

Firestarter / Sharpener

One of our favorite new products, this SOG sharpener is a great example of innovative design in a concise package. With a flat diamond sharpening pad, cylindrical ceramic sharpener (that can be used for serrations) as well as a fire starter (just in case), you have the makings of the perfect companion to any SOG knife or tool.

Handle: Glass-Reinforced Nylon

Weight: 0.7 oz.

Clam Pack Only

Run knife edge along the flat sharpener to sharpen straight edges.

Use white curved sharpener for sharpening serrated edges..

Run the back of the blade along the flint rod for fire starting.

Key Knife

NEW 4

We have a saying that the best knife is the one that you have with you! Always be prepared with the new Tool Logic Key knife. This is the first lockback of its kind. Open up your awareness. We love the fact that sometimes we wish we had a knife to clean our fingers, cut a rope, open a box, sever a thread. Now we do.... always. Our new key knife just might save the day, unless of course, you lock it in the trunk.

Open:	4"	Weight:	0.7 oz.
Blade:	1.5"	Steel:	5Cr13MoV Stainless Steel - Rc. 55-57
Handle:	Stainless Steel	Clam Pack Only	

KEY-01

The Key Knife fits perfectly on any key chain, and stays discreetly hidden until you need it!

Transforma

NEW 5

For years, we have been perfecting the science of preparedness with our knives, tools and credit cards. The Transforma captures this essence by combining illumination along with the versatility of our credit card components in one convenient package. Twist the bezel and a powerful LED ignites. Slide out the knife or other components from the back for quick access. Clip on to hat, belt, visor, backpack for instant gratification. Transforma, who says we can't 'have it all'?

Length:	4.6"	Weight:	3.7 oz.

Warranty

SOG Warranty Information:

All SOG knives, tools and gear are guaranteed against defects in workmanship and materials for the life of the original purchaser. Sharpeners are guaranteed for one-year from the time of purchase. This guarantee is voided (as determined by SOG) by misuse, abuse, improper maintenance, or alterations of the product and does not cover any normal wear or tear that might occur.

We are not responsible for lost or stolen packages that do not arrive to our facility.

SOG reserves the right to the repair or replacement of a product at our discretion. Products that are discontinued and not repairable will be returned as-is with a gift certificate of similar value, as determined by SOG, which can be used for a future purchase.

Examples of Non-Warranted items:

Rusted/spotted/stained blades or handles (coated or not), broken or bent knife tips, worn tool components, dull/chipped knife blades, scratched blade/tool coatings, worn/loose Kraton slabs, sheaths and pouches (if brand new sheaths are determined to be defective they are replaced separately from the knife/tool), and broken/lost thumb studs.

SOG Unconditional Pocket Clip Warranty:

Pocket clips can be broken if they are accidentally caught on foreign objects while wearing. To help prevent such occurrences, SOG recommends that you wear your knife in your front pocket, with the knife inside your pocket. If, for whatever reason, your clip bends or breaks and you would like to receive a replacement, email or visit http://sogknives.com/store/clip_request.html. Damage to a knife handle because a clip has snagged is not considered "normal," and any such damage will be assessed under warranty.

Sharpening:

SOG offers a sharpening service for our products at the minimal charge of \$12.00.

Broken Blades:

In the unlikely case that your knife blade breaks, we will do a hardness test on it to see if it is within specs and therefore eligible for replacement.

Costs:

SOG will pre-determine the cost of repair or replacement of non-warranted items and communicate the estimated cost to the customer before any work is performed.

When returning product for warranty/replacement please do the following:

Include a brief note inside your package stating what you are returning, the claimed defect and how it failed. Also, include inside the package, your name, address, and a daytime phone number or email address to reach you in case we have any questions.

Send all warranty claims to:

SOG Specialty Knives and Tools, LLC
Attn: Warranty Dept.
6521 212th St. SW
Lynnwood, WA 98036
USA

For any other questions, either call, fax, or email SOG's warranty department at:

Phone: 425-771-6230 ext. 229
Toll Free: 888-40-KNIFE (405-6433)
Fax: 425-771-7689
Email: warranty@sogknives.com

SOG Specialty Knives and Tools, LLC reserves the right to change specifications, prices, and information without notice.

Laser Engraving

SOG has a complete laser engraving department. All of our knives and multi-tools can be engraved with your slogan or company logo. Call the SOG sales department for more details.
